

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019-2020 (Even Semester)

INNOVATIVE TOOLS

Degree, Semester & Branch: VIII Semester B.E. Computer Science and Engineering

Course Code & Title: GE6075 Professional Ethics in Engineering

Name of the Faculty member: Mr.R.Venkatesh

Innovative Practice - Flash Cards

TOPIC: Resolving moral dilemmas, Justifying moral obligations

Date: 04.02.2020

Objectives

- To enable the students to create an awareness on engineering ethics.
- To understand the Moral dilemmas and moral obligations.
- Students will be able to improve their communication skills.

Outcome (O) (At the end of the learning technique, the students will be able to)

- Explain about engineering ethics, moral dilemmas and moral obligations.

Justification for choosing the topic

In recent years, Students need to be challenged to stimulate their learning in moral aspects. Applying challenge in practice however is not straightforward. Challenging students may conflict with other responsibilities, creating potential dilemmas for students. This study discloses dilemmas students encounter when challenging in society as well as the considerations accompanying their actual choices for action when coping with these dilemmas. In this course explain about Moral dilemmas and moral obligations. Moral dilemmas are situations in which the decision-maker must consider two or more moral values or duties but can only honor one of them; thus, the individual will violate at least one important moral concern, regardless of the decision. This chapter draws a distinction between real and false dilemmas. Once they can understand the Moral dilemmas and moral obligations, they can be able to Resolve moral dilemmas and justify the moral obligations in any working conditions or any situations.

Use of Flash Cards:

- It helps students to identify the definition of one important concept.
- It motivates the students to identify the term associated with each definition and questions.
- It helps the students to use as a quick reference to revise the concepts of moral dilemmas and moral obligations.

Procedure of this Flash Card Game:

- A flash card is a card with question on one card and corresponding answer on another card.
- Question and answer of the card is prepared based on topic taught by the faculty in the class on particular day. The event is conducted at the end of the class hour on the day.
- Questions and answer cards will be distributed to students in the class.
- Once the question will be asked by one of the students in the class from the card, other students of the class will listen the questions and who is having the corresponding answer card, they should identify it correctly and explain the answer in front of the class.
- This will help the students to revise the particular topic on the day.

Activity:

- Questions and Answer cards are prepared in chart paper.
- The entire question card is given to one particular student of the class and answer card will be distributed to the group of the students in the class.
- Student who is having question card will ask the question one by one in class. For each questions, he will give one minute time to identify the answer card by the students group.
- Other students of the class will listen to the question and find out the corresponding answer card which they are having based the topic discussed in class on the day.
- Any one of the group found the answer card with them, one of the student from the group will come in front of the class and he/she will explain the answer for the question.

REFLECTIVE CRITIQUE: Challenges

- Making student participation was challenging. Initially, the students felt shy to participate.
- Even though the students identify the correct answer, they didn't answer first due to shyness.
- Some of the students were discussing the answers on their own while conducting the practice.

Steps to be taken to avoid the problems.

- Motivated the students to their involvement during the activity.
- Course instructor explained the concepts once again and instructed the questioner to repeat the question once again clearly to make the students for clear understanding of question.

POST IMPLEMENTATION

- Based on the activity and student's feedback, they felt that it was easy to understand the concept.
- Students explored the knowledge of moral dilemmas and moral obligations. It helped the students to Resolve moral dilemmas and justify the moral obligations in any working conditions or any situations.

RELEVANCE OF PROGRAM OUTCOMES

Programme Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
Outcome(O) CO2	1	-	-	-	-	2	-	3	1	2	-	2
