

## Department of Computer Science and Engineering

Academic Year 2021– 2022(Odd Semester)

Degree, Semester & Branch: B.E – I Semester CSE

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE

### Innovative Practice Description

- **Unit / Topic:** Unit II / Precedence of operators
- **Course Outcome:** CO2
- **Topic Learning Outcome:** TLO5
- **Activity Chosen:** Think Pair Share
- **Justification:**
  - Think pair share activity involves the students to think individually and to share the knowledge with classmates.
  - In python, precedence of operators helps in solving the expressions.
  - The students individual solving capability can be tested and the gained ideas can be shared by think-pair-share activity
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
  - Faculty explained the concept of the precedence of operator
  - Expressions containing different precedence were displayed
  - Students were asked to write the answer for the expressions by evaluating them using the precedence table individually within given time as shown in Fig 1.
  - Then the students were asked to discuss the answers with their neighbors as shown in Fig 2
  - Few students were called in front of the class and asked to share the correct answers after discussion as shown in fig 3.

- **CO – PO / PSO mapping:**

| CO  | PO1 | PO2 | PO3 | PO9 | PO10 | PSO1 |
|-----|-----|-----|-----|-----|------|------|
| CO2 | 3   | 1   | 1   | 1   | 1    | 1    |

(1 – Low      2 – Moderate      3 – High)

• **PO / PSO mapped:**

| Innovative practice                  | PO1                                                                                            | PO2                                                                                          | PO3                                                                                  | PO9                                                                           | PO10                                                                                                     | PSO1                                                                                                  |
|--------------------------------------|------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Justification for correlation</b> | It involves logical thinking and make the student able to think about problem solving approach | Students will be able to approach the problem by applying the types of operators they learnt | Students will be able to provide solution for the problem using the precedence chart | As the student involved in the activity as team, the team work skill improved | Students communication skill will be improved as they are facing audience and communicating the activity | The problem solving skill earned through this activity helps the students in solving various problems |

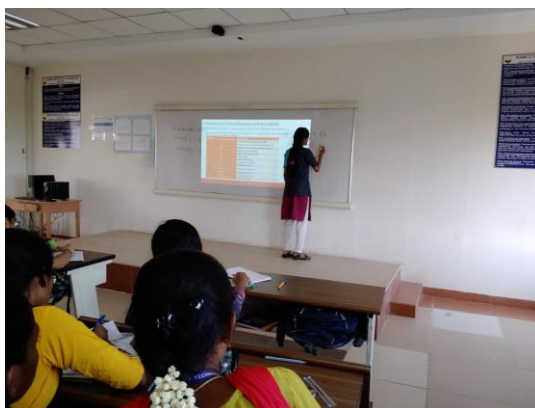

• **Images / Screenshot of the practice:**

**Fig 1: Students thinking about the given problem**

**Fig 2: Students pair with neighbours and discuss answers**

**Fig 3: Student share the knowledge to whole class**

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- The students felt that this activity is so interesting and helps them to remember the concepts of operators.
- They said it will be very helpful when preparing for exams

- ❖ ***Benefit of the practice:***

- This practice helps the students to remember the concept as they applied what they studied
- It leads to peer to peer learning
- It helps in improving the communication by effectively delivering the things they learnt

- ❖ ***Challenges faced in implementation:***

- All the students were unable to complete the task within allotted time
- Few students found it difficult to solve the expressions individually. After discussion, they felt easy
- Unable to complete the activity within planned time
