

RAMCO INSTITUTE OF TECHNOLOGY
Department of Computer Science and Engineering
Academic Year: 2020- 2021 (Even Semester)

Date: 14.06.2021

Degree, Semester & Branch:II Semester B.E. CSE – A

Course Code & Title: CS8251 Programming in C

Name of the Faculty member: Ms.G.Sakthi Priya

Innovative practice: Active Learning- Matching game – Memory puzzle

Topic: Structures

Objectives of the activity:

O1 : To enable the students to familiarize the basic concepts of structures.

Justification for choosing the topic:

Structure is one of the most important concepts in C, in order to make the students familiar with structures a game based activity was chosen instead of carrying out regular multiple choice question test.

Activity:

A matching game is one of the memory puzzle activity which helps the students to recollect the concept and try to find out the answer.

The activity was conducted in google meet with duration of 20 min. The students were displayed with a memory puzzle of 6 programs with 6 answers (total 12 tiles) which is given in figure 1. They have to randomly chose two tiles. If both the tiles matched, then the tile will be freezed as such. If not, both the titles will be closed. Now the students know what is inside the chosen two tiles. In the second attempt they were asked to choose other two random tiles. The above mentioned process will be continuing until all the tiles are freeze. The implementation of matching game – memory puzzle on structures is given in figure 2.

Outcome:

- From that we can find out that, most of the students had familiarity with the basic of structure concept
- This activity helped the students to think and recall information and improve their problem solving skills.

Relevance Mapping - This activity helps in attaining the following Objectives – PO mapping:

Objectives/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
O1	3	1	-	-	-	-	-	-	3	-	-	1

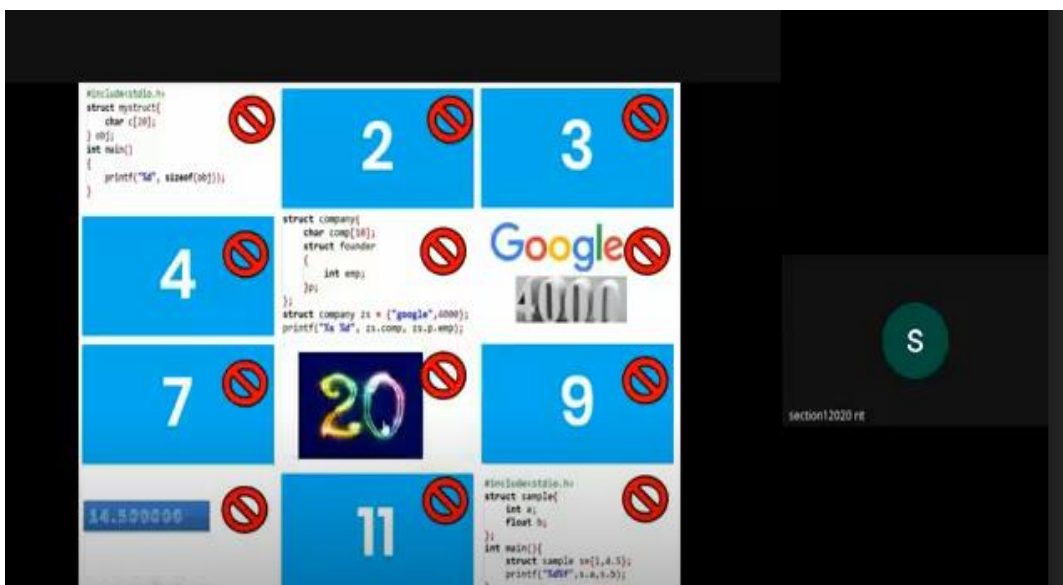

Fig 2: Implementation of memory puzzle

Reflective Report

Identified Challenges:

- Few students do not recollect the structure concept and not replied during online classes.

Addressing challenges:

- The concepts were explained again with the syntax of different programming constructs.

- The students were motivated to have the frequent coding practice

Post implementation

- All the students enthusiastically participated the puzzle activity.
- They can easily remember the basic concepts of structures
