

Department of Computer Science and Engineering

Academic Year 2021– 2022 (Even Semester)

Degree, Semester & Branch: B.E, IV, CSE

Course Code & Title: CS8493 & Operating Systems

Name of the Faculty member (s): Dr.I.Gethzi Ahila Poornima

Innovative Practice Description

- **Unit / Topic: Unit V / Android SDK Framework**

- **Course Outcome: CO5**

- **Topic Learning Outcome: TLO2**

- **Activity Chosen: One Minute Paper**

- **Justification:**

Android SDK framework

- **Time Allotted for the Activity: 15 Minutes**

- **About the Event:**

A particular topic whose understanding is very important in the point of examinations and further understanding of the upcoming topics is chosen. This topic will be taught in the first 25 minutes of the class. At the end of the class, to analyse the level of understanding of the students, the students will be asked to write a few points regarding the topic taught in the class. From their write-up, the course instructor could know the level of understanding of students.

- **Details of the Implementation:**

The Android and iOS architecture was discussed in the class. Also, the SDK framework and its features were discussed. At the end of the class, all the students were asked to write a few points about SDK framework. The students wrote few points from SDK framework up to their understanding level. The content that they had written was verified at the end. After evaluating the one-minute paper written, the understanding level of the students were identified. Around 10 % of students have written very few points from SDK framework. A sample page written by Mr.N. Dhiraj is given in Figure 1.

- **CO – PO / PSO mapping:**

CO	PO2	PO3	PSO1
CO2	1	2	2

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO2	PO3	PSO1
	1	2	1
Justification for correlation	Students could formulate complex engineering problems by acquiring deep knowledge in mobile operating systems which enables the students to develop mobile apps.	Students will be able to describe the features of SDK framework which is useful for developing several kinds of software especially mobile applications.	By understanding the mobile operating systems the students will be able to develop various software components especially mobile application development.

• **Images / Screenshot of the practice:**

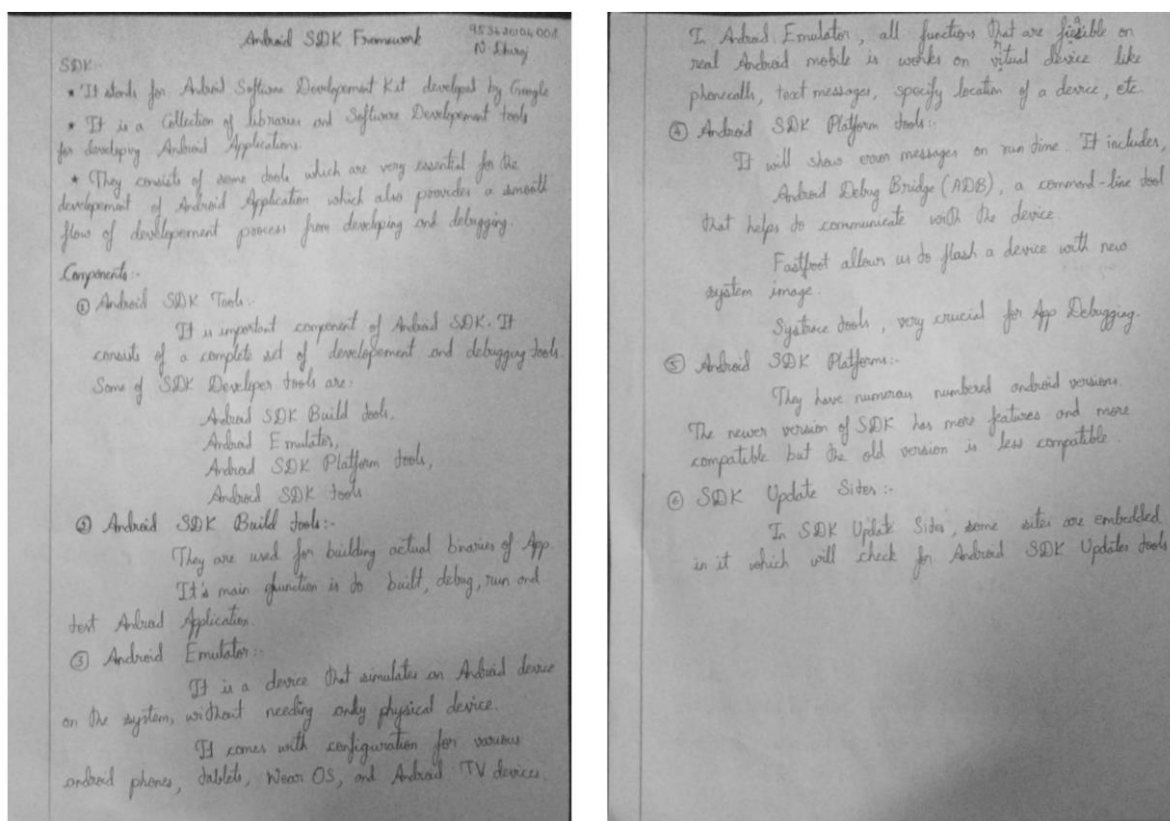

Figure 1- Sample Page written by Mr.Dhiraj (953620104008)

• **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**
- ❖ The students gave good feedback about this activity. They felt that, they could be more thorough with this concept by doing this activity.
- ❖ **Benefit of the practice:**

- Most of the students take this activity as positive and started writing the features of SDK framework in the paper.
- It can be easily tracked whether the students have understood the concept clearly or not.

❖ ***Challenges faced in implementation:***

- Very few students are not confident in their understanding towards this concept. They hesitated to prepare a write up on this concept.
