

Department of Computer Science and Engineering

Academic Year 2022– 2023 (Odd Semester)

Degree, Semester & Branch: B.E, V, EEE

Course Code & Title: CS8392 & Object Oriented Programming

Name of the Faculty member (s): Dr.I.Gethzi Ahila Poornima

Innovative Practice Description

- **Unit / Topic:** Unit V / Swing Components
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO13
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - The main result of this course is the development of Java applications. In order to accomplish this and give the programme a decent appearance and feel, the GUI is crucial. Hence Swing components are crucial in the development of such apps.

- **Time Allotted for the Activity:** 15 Minutes

- **About the Event:**

A specific topic is picked whose comprehension is essential for exams and for gaining a deeper understanding of forthcoming topics. The first 25 minutes of the class will be spent covering this subject. The students will be asked to write a few points about the subject covered in class at the end of class in order to assess their level of understanding. The course instructor could determine the students' level of understanding through their written work.

- **Details of the Implementation:**

With the help of example Java programmes, the basic swing components, declared methods, etc., were discussed. All of the students were required to construct the registration form, which had a few swing components, by writing the corresponding code at the conclusion of the lesson. According on their level of understanding, the students coded. At the conclusion, the information they had written was validated. The students' knowledge level was determined after reviewing their one-minute essay. Approximately 5% of students had trouble writing the coding. The remaining students all wrote their answers accurately. A sample page written by Ms.P. KayalVizhi is given in Figure 1.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PSO3	PSO1
CO2	3	3	2	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PSO1
	3	3	2	1
Justification for correlation	The students will evaluate problem statements and identify modules and parameters to develop interactive Java applications	Students could be able to identify the requirement and code accordingly by acquiring knowledge about swing components.	The students will be able to implement and integrate the modules in interactive Java application programs..	The students will solve problems by creating interactive applications using swings.

Login Page program

```

import javax.swing.*;
import java.awt.*;
import java.awt.event.*;

public class JavaGUI implements ActionListener {
    private static JLabel passwordLabel;
    private static JTextField username;
    private static JButton button;
    private static JPasswordField password;
    JPanel panel = new JPanel();
    panel.setLayout(null);

    JFrame frame = new JFrame();
    frame.setTitle("LOGIN PAGE");
    frame.add(panel);
    frame.setSize(new Dimension(400, 300));
    frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);

    label = new JLabel("Username");
    label.setBounds(100, 80, 70, 30);
    panel.add(label);
    Username = new JTextField();
    Username.setBounds(100, 87, 193, 28);

```

```

JOptionPane.showMessageDialog(null, "Login Successful");
else
JOptionPane.showMessageDialog(null, "Username or Password mismatch");
}

```

Output :

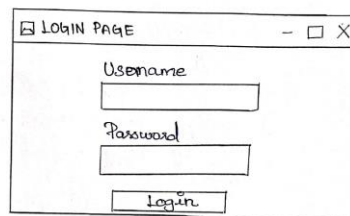

Figure 1- Sample Page written by Ms.P. KayalVizhi (953620105009)

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

The students gave good feedback about this activity. They felt that, they could be more thorough with this concept by doing this activity.

❖ ***Benefit of the practice:***

- Most of the students take this activity as positive and started designing their own registration or login form.
- As a faculty, I could identify the level of understanding swing components.

❖ ***Challenges faced in implementation:***

- Very few students hesitated to write coding for the given page.
