

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering Academic Year 2022 – 2023 (Odd Semester)

Degree, Semester & Branch: V Semester B.E. EEE

Course Code & Title: CS8392 Object Oriented Programming

Name of the Faculty member (s): Dr.I.Gethzi Ahila Poornima , AP/CSE

Innovative Practice Description

- **Unit / Topic: Unit III / Throwing and Catching Exceptions**
- **Course Outcome: CO3**
- **Topic Learning Outcome: TLO6**
- **Activity Chosen: Reflection**
- **Justification:**
- In order to manage unanticipated runtime problems in projects and aid the user in understanding the error that happened, exception handling is necessary. Because of this, a reflection activity was created to help the teacher understand how well the students had grasped the relevant ideas.
- **Time Allotted for the Activity: 15 Minutes**
- **Details of the Implementation:**
 - At the conclusion of the session, the activity was carried out in a classroom for a total of 15 minutes.
 - The students learned about "throwing and catching exceptions" with the help of examples.
 - The students were instructed to write down any questions about the subject of exception handling mechanisms that they still have after class.
 - The questions the students want to include in a paper were written by them and submitted. It is shown in Fig. 1.
 - After writing explanations for the questions on the papers, the teacher distributed the assignments to the students in the subsequent class.
 - After reading the responses, the student's queries were clarified.
 - A number of students had questions, and those questions were clarified in class the following day for everyone.
- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO8	PO9	PO10	PO12	PSO1	PSO2	PSO3
CO3	3	3	2	1	2	2	1	1	1	2

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO10	PSO1
	3	1	1	1	1

Justification for correlation	The idea of an exception handling mechanism is introduced to the students, who then use it when creating projects.	The students examine the throwing and catching exceptions to manage and avoid abnormal programme termination.	The students find the solutions for abnormal termination of applications.	The Student's concise writing of their questions helped them develop their skills.	The students apply the exception handling mechanism in developing smooth software applications.

TUDHAYA

What will happen to handle the exception if no try-catch block is not used?

If no try-catch block is used, exception will be caught by default handler provided by Java Run-Time System.

Fig 1: Reflection activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students were allowed to evaluate themselves and identify areas where they needed further clarification.
- It was simple to identify the subtopic that many students found confusing.

- ❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)
 - This activity makes it simple to identify students who didn't get the fundamentals and to provide them with further explanations in the subsequent lesson, so raising their comprehension level.
- ❖ ***Challenges faced in implementation:***
 - Since some students didn't ask any questions, we weren't able to gather an accurate representation of the opinions of all the students.
