

## Department of Computer Science and Engineering Academic Year 2021 - 2022 (Even Semester)

**Degree, Semester & Branch:** VI Semester B.E. Computer Science and Engineering

**Course Code & Title:** CS8601 & Mobile Computing

**Name of the Faculty member (s):** Ms.P.Jothi Thilaga, AP/CSE

### Innovative Practice Description

- **Unit / Topic:** Unit III / MANET vs VANET
- **Course Outcome:** CO3
- **Topic Learning Outcome:** TLO10
- **Activity Chosen:** Group Discussion
- **Justification:**

MANET and VANET is an important topic in telecommunications. The activity of group discussion makes it easier to learn the topic of MANET and VANET. It helps the students to get a comprehensive knowledge on this topic. Students think individually and share their ideas with their classmates, which improves creative thinking and oral communication skills.

- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**

At the end of the class, the students were asked to think individually about the MANET and VANET concept as discussed in the class for 5 minutes. Then the students shared their understanding of the concepts in that topic. Finally, each group of students shared about the particular concept to the entire Class. The key terms of MANET and VANET are shared by the students through this activity are depicted in the figure 1. This activity shows whether the students are able to understand the concept and their involvement in the particular class.

- **CO – PO / PSO mapping:**

| CO  | PO1 | PO2 | PO3 | PO4 | PO10 | PSO1 | PSO2 | PSO3 |
|-----|-----|-----|-----|-----|------|------|------|------|
| CO1 | 3   | 2   | 2   | 2   | 2    | 1    | 1    | 1    |

(1 – Low      2 – Moderate      3 – High)

• **PO / PSO mapped:**

| Innovative practice           | PO1                                                                                                                   | PO2                                                                            | PO3                                                                                     | PO4                                                                                   |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|                               | 3                                                                                                                     | 2                                                                              | 2                                                                                       | 2                                                                                     |
| Justification for correlation | Able to apply theory and principles of computer science and engineering to understand the concept of MANET and VANET. | Able to use computer engineering principles to study the MANET & VANET concept | Identify certain networking concepts to solve complex engineering problem               | Choose appropriate terminologies to analyse complex problems on communication system. |
|                               | PO10                                                                                                                  | PSO1                                                                           | PSO2                                                                                    | PSO3                                                                                  |
|                               | 2                                                                                                                     | 1                                                                              | 1                                                                                       | 1                                                                                     |
|                               | Able to explain the various terminologies of MANET and VANET in mobile communications                                 | Able to practice mobile technologies to solve complex problems.                | Able to use mobile technologies and assignment schemes to develop reliable IT solutions | Able to choose appropriate technology to solve real world problems in Industry.       |

• **Images / Screenshot of the practice:**

*Figure 1: Group Discussion Activity*

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that they can able to understand the MANET & VANET concept clearly after conducting this activity.
- Also they can able to recall the key terminologies in MANET & VANET concept.

❖ ***Benefit of the practice:***

- Students were actively participated and discussed.
- From this activity, the key terminologies of MANET & VANET concept were well understood to the students.
- Able to attend this topic in Internal Assessment Test.

❖ ***Challenges faced in implementation:***

- Some students are hesitated and lack to share the concepts that they learnt in the class.
- Make the students to know the impact and importance of sharing their views and understanding related to the topic and made them involve in the activity.
