

Department of Computer Science and Engineering
Academic Year 2021 - 2022 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. Computer Science and Engineering

Course Code & Title: CS8601 & Mobile Computing

Name of the Faculty member (s): Ms.P.Jothi Thilaga, AP/CSE

Innovative Practice Description

- **Unit / Topic:** Unit I / Introduction
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO3
- **Activity Chosen:** Think-Pair-Share
- **Justification:**

Fixed assignment scheme such as TDMA, FDMA, SDMA and CDMA is an important concept in Mobile Computing. These assignment scheme has several mechanisms that can easily understood and recalled by conducting this activity. It helps the students to get a comprehensive knowledge on this topic. Students think individually about the different assignment mechanisms and share their ideas with their classmates, which improves creative thinking and oral communication skills.

- **Time Allotted for the Activity:** 15 Minutes
- **Details of the Implementation:**

At the end of the class, the students were asked to think individually about the mechanisms of assignment schemes as discussed in the class for 5 minutes. Then the students shared their understanding of the concepts in that topic and the content that was not clear in that particular topic to their pairs. Finally, specific pairs of students shared the different mechanisms of TDMA to the entire Class. The key points on TDMA mechanisms are shared by the students through this activity are depicted in the figure 1. This activity shows whether the students are able to understand the concept and their involvement in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO10	PSO1	PSO2	PSO3
CO1	3	2	2	2	2	1	1	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4
	3	2	2	2
Justification for correlation	Able to apply theory and principles of computer science and engineering to understand the basis of mobile computing.	Able to use computer engineering principles to study the different assignment schemes	Identify the different assignment schemes to solve complex engineering problem	Choose appropriate scheme to conduct investigations on complex problems on communication system.
	PO10	PSO1	PSO2	PSO3
	2	1	1	1
	Able to explain the various schemes and demonstrate its application in mobile communications	Able to practice mobile technologies to solve complex problems.	Able to use mobile technologies and assignment schemes to develop reliable IT solutions	Able to determine appropriate schemes to solve real world problems in Industry.

• **Images / Screenshot of the practice:**

Figure 1: Think-Pair-Share Activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that they can able to understand the different assignment schemes clearly after conducting this activity.
- Also they can able to recall the key terms in each assignment mechanisms.

❖ ***Benefit of the practice:***

- Students were actively participated in this activity.
- From this activity, the muddiest parts in the concept were identified and the key points of different assignment mechanism were explained again in the next class for well understanding.
- Able to attend this topic in Internal Assessment Test.

❖ ***Challenges faced in implementation:***

- Some students are hesitated and lack to share the concepts that they learnt in the class.
- Make the students to know the impact and importance of sharing their views and understanding related to the topic and made them involve in the activity.
