

Department of Computer Science and Engineering

Academic Year 2021 – 2022(Odd / ~~Even~~ Semester)

Degree, Semester & Branch: B.E, I & CIVIL

Course Code & Title: GE3151 & Problem Solving and Python Programming

Name of the Faculty member (s): Dr.M.Gomathy Nayagam

Innovative Practice Description

- **Unit / Topic:** Unit III / Break, Continue and Pass
- **Course Outcome:** CO 3
- **Topic Learning Outcome:** TLO7,8
- **Activity Chosen:** Think-Pair Share
- **Justification:**
After teaching the concept of break, continue and pass, this task is given to evaluate students' understanding of the concept.
- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**
The course instructor explained the concept of break, continue and pass statement for first 20 minutes of class duration. He instructed the students to make pair in their bench itself. After made the pair, the course instructor displayed the programming examples of break, continues and passes statement and asked the output of each programs. He gave 2 minutes time to think about the answer of each pair of students as shown in fig 1.a. After thinking, he allotted 5 minutes to give the answer of the programming examples and ask the pair of students to explain the reason for the answer as shown in fig 1.b.

Fig.1a. Students think about the Concept with their peer members

Fig.1b. Two pairs of students (Sample) explained the concept to the class

- **CO – PO / PSO mapping:**

CO	PO 1	PO 2	PO 3	PO 10	PO 12	PSO 3
CO 2	3	2	2	2	2	1
(1 – Low 2 – Moderate 3 – High)						

- **PO / PSO mapped:**

Innovative practice	PO 1	PO 2	PO 3	PO 10	PO 12
	3	2	1	1	2
Justification for correlation	Students could be able to apply basic engineering theory and principles of break, continue and pass statements	Students could be identify their own example to explain the concepts of break, continue and pass statements	Students could be able to recollect the basic principles of break, continue and pass	Students could able to interpret and explain the break, continue and pass statements to their peer	Students interacted and shared their views about the concept with their peer group by ethically

Innovative practice	PSO 3
	2
Justification for correlation	Students could be able to use break, continue and pass statement in real time problems.

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students felt that this activity is very useful and got good idea about the break, continue and pass statements

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- o Most of the pairs of students explained the concepts well

- ❖ **Challenges faced in implementation:**

- o Due to time limitation, only few pairs of students were made to do the presentation in front of the class by random call.
