

Department of Computer Science and Engineering

Academic Year 2021 – 2022(~~Odd~~ / Even Semester)

Degree, Semester & Branch: B.E, VI & CSE

Course Code & Title: CS8603 & Distributed Systems

Name of the Faculty member (s): Dr.M.Gomathy Nayagam

Innovative Practice Description

- **Unit / Topic:** Unit I / Physical Clock Synchronization: NTP
- **Course Outcome:** CO 1
- **Topic Learning Outcome:** TLO3
- **Activity Chosen:** Reciprocal Peer Questioning
- **Justification:**

To comprehend Physical Clock Synchronization, students must have a thorough understanding of the various logical timing concepts. As a result, the instructor adopted this novel method to help pupils grasp the basics of Physical Clock Synchronization.

- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**

The lecture by the Course Instructor concluded the fundamentals of Physical Clock Synchronization. During the presentation, the course instructor insisted that the students prepare questions pertaining to the session's theme. Questions had been prepared by the students. The students posed the question to their peers. The other members of the class listen the question and voluntary answered the questions. If the question is not answered by the peer group of people, the course instructors answered the question and explain the concepts. The fig1. shows the sample students(Ms.Sahana Sri and Ms.Sophia Sree) asked the question to their peer members. The fig2. Shows the sample students (Mr.Kanthimathinathan, Mr.Abinav and Mr.Rahteesh Praveen) answered the questions by their peers.

Fig1. Students asking question to their Peer Member

Fig.2. Students answered the question to their Peer Member

• **CO – PO / PSO mapping:**

CO	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3
CO 1	3	2	1	-	-	-	-	-	1	2	-	1	3	3	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO 1	PO 2	PO 3	PO 9	PO10
	3	2	1	1	2
Justification for correlation	Students could be able to apply basic theory and principles of Logical Timing and Physical Clock Synchronization	Students could be able to answer the questions of their peer member with the help of gathered knowledge in the topic	Students could be able to recollect the basic principles NTP	Students could be able to get the knowledge and prepare the questions, prepared and answered the questions individually.	Students interacted and shared their views about the concept with their peer group

Innovative practice	PO 12	PSO 1	PSO2	PSO 3
	1	3	3	2
Justification for correlation	Students continuously learn and prepare the questions in the concept by their own	Student could be able to apply the concept of clock synchronization in mobile technologies	Student could be able to apply the clock synchronization concepts in Cloud computing application	Students could be able to apply NTP in AI

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

The students provided oral input, stating that they had learnt the concept in enjoyable manner.

- ❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Students had understood the concepts of NTP.
- Students had improved their self-learning capabilities

- ❖ ***Challenges faced in implementation:***

- *Making Every Students to prepare and answer the questions.*
