

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2025 – 2026 (Even Semester)

Degree, Semester & Branch: B.E.VI Computer Science and Engineering

Course Code & Title: CCS361 – Robotic Process Automation

Name of the Faculty member (s): Dr.M. Swarna Sudha

Innovative Practice Description

Unit II – Topic: Automation Process – Sequence, Flowchart, Workflow

Course Outcome: CO2

Topic Learning Outcome: 2.2

Activity Chosen: Logic Flow Activity – Human Workflow Automation Challenge

Justification:

The Logic Flow Activity helps students understand automation process concepts through active participation and experiential learning. Instead of learning workflow concepts only through theory, students design and execute workflows based on real-world scenarios. This activity improves logical thinking, analytical skills, teamwork, and communication abilities. Students gain a clear understanding of sequence workflow and flowchart implementation through practical interaction.

Time Allotted for the Activity: 30 Minutes

Details of the Implementation:

•Group I: Arunadevi M, Sri Prishigaa R, J K Kaviyalakshmi, Durgadevi M, Senthathi Kalai Pandiyan P, Muthumari M, Jumana Jaseela J, Nithya Sri S, Deepalakshmi M, Sivapriya A, Harish N, Jeyaseelan S, Karthika A.

Group II: Sathyapriya K, Jeci Carmel A, Lalith Krishna V M, Vashini J, K S Kamalasri, Shenbagapriya A, Dhurka Devi S, Mohamed Amma Gulshan M, Hemamalini R, Udhasankari R, Nameetha K, Vignesh A, Abisri M.

Group III: Chriswin Prayson J, Rajeswari C, Asma M, Lakshitha S, Selvamani M, M Pranav, Anish Kumar R, Athish M, Ram Kumar S, Shrija A, Diliban S M, Pavithra M, Deepak Lingaraj M.

Group IV: Padmadharshini B, Janaramji R, Divyadharshini A, Priyadharshini K, Pasam Rajavardhan, Dhivya Dharshini A, Praveen Kumar R, Amrutha V, Arjun S, Ramakrishnan A, Sakthi Sundari G, Karuppasamy A, Lokesh Kumaran M.

Group V: Sindhe Mohith Siva Sai, Siva K, Harishkumar I, Sanjay P, Muneeswaran M, Muviya M, Sona S, Prince S, Sandhib K, Sivaganesh K, Vignesh A P, Sri Pon Mathu Swasthik P

Real-world automation scenarios such as online shopping, ATM cash withdrawal, student attendance management, hospital appointment booking, and railway reservation systems were assigned to each group.

• Students identified:

- Start and End points
- Input and Output conditions
- Sequential process steps
- Decision-making conditions (Yes/No)
- Alternative workflow paths

One student from each group acted as an automation bot. The students who acted as automation bots were **Senthatti Kalai Pandiyan P, Lalith Krishna V M, Anish Kumar R, Ramakrishnan A, and Muneeswaran M**, while the remaining students represented users, systems, and decision nodes during workflow execution. Students physically arranged themselves according to the workflow sequence and executed the process flow. • Students designed both sequence workflow and flowchart representations of their assigned process. Faculty consolidated the concepts and corrected workflow errors after completion of the activity.

CO – PO / PSO mapping:

CO	PO4	PSO2
CO2	2	2

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO4	PSO2
	2	2
Justification for correlation	Students analyze workflow requirements and develop appropriate logical solutions for automation problems.	Students can design workflow-based solutions and apply automation concepts to real-world scenarios.

Screenshot of the practice:

Fig.1. Students performing Logic Flow Activity – Human Workflow Automation Challenge

Reflective Critique:

- Students actively participated and demonstrated interest in workflow creation.
- Logical and analytical thinking skills improved through workflow design activities.
- Students developed better understanding of sequence and flowchart concepts through practical implementation.

- Students gained confidence in presenting workflow solutions.

Benefit of the practice:

- Better understanding of workflow concepts through practical learning approaches.
- Improved ability to identify and correct workflow logic errors
- Enhanced capability to explain sequence and flowchart concepts clearly.
- Stronger connection between theoretical concepts and real-world applications.

Challenges faced in implementation:

- Some students initially found it difficult to identify workflow decision point
- Time management became challenging during group discussions.
- Equal participation from all students could not be ensured in some group
