

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2025 – 2026 (Even Semester)

Degree, Semester & Branch: B.E.VI Computer Science and Engineering

Course Code & Title: CCS361 – Robotic Process Automation

Name of the Faculty member (s): Dr.M. Swarna Sudha

Innovative Practice Description

Unit IV – Topic: Exception Handling – Error Reporting

Course Outcome: CO3

Activity Chosen: Peer Code Review

Justification:

Peer Code Review promotes collaborative learning by enabling participants to analyze automation workflows, identify errors, evaluate exception-handling mechanisms, and suggest improvements. The activity enhances debugging skills, logical reasoning, problem-solving abilities, and understanding of error reporting techniques in RPA workflows.

Time Allotted for the Activity: 30 Minutes

Details of the Implementation:

- After completing the topic **Exception Handling – Error Reporting**, participants were asked to develop simple UiPath workflows containing exception-handling mechanisms.
- Each students exchanged their workflow with another participant for review.
- The reviewer examined the assigned workflow and identified:
 - Possible runtime and business exceptions
 - Error messages generated during execution
 - Exception-handling activities used
 - Logging and error-reporting mechanisms implemented
 - Areas requiring improvement
- Review comments and suggestions were documented using a peer review sheet.
- Participants discussed the identified issues and proposed suitable corrections for improving workflow reliability.
- Selected participants demonstrated their workflows and explained the exception-handling strategies adopted.
- Faculty members reviewed the observations made by the participants and highlighted best practices in error reporting, logging, and exception handling.

- The activity enabled participants to learn from one another's approaches and gain practical exposure to workflow debugging and error management.

CO – PO / PSO mapping:

CO	PO4	PO5	PSO2
CO4	2	2	2

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO4	PO5	PSO2
	2	2	2
Justification for correlation	Ability to investigate workflow execution errors, analyze exception reports, and provide suitable corrective actions through systematic review.	Application of modern automation tools and debugging techniques to identify, report, and resolve workflow exceptions effectively.	Ability to develop reliable automation solutions by implementing appropriate exception-handling and error-reporting mechanisms.

Screenshot of the practice:

Fig 1 Peer Discussion and Review Session Conducted for Exception Handling and Error Reporting

Fig 2 Engaged in Peer Code Review for Exception Handling and Error Reporting

Reflective Critique:

- Understanding of exception handling and error reporting concepts improved through collaborative analysis.
- Debugging and workflow review skills were strengthened.
- Participants gained confidence in identifying and resolving workflow execution errors.

Benefit of the Practice:

- Better understanding of exception-handling mechanisms in automation workflows.
- Improved ability to analyze workflow errors and error messages.
- Enhanced debugging, code review, and problem-solving skills.
- Increased awareness of best practices for logging and error reporting.

Challenges faced in implementation:

- Some participants found it difficult to identify the root cause of errors and exceptions in the assigned workflows.
- Variations in programming and automation knowledge resulted in different levels of review quality.
- Reviewing and providing constructive feedback within the allotted time was challenging.
- Some participants were initially hesitant to critique their peers' work and suggest improvements.
