

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year 2021– 2022(Odd Semester)

Degree, Semester & Branch: V Semester B.E., CSE

Course Code & Title: CS8591 Computer Networks

Name of the Faculty member (s): M.Swarna Sudha

Innovative Practice Description

- **Unit / Topic:** Unit: Unit 5 /DNS
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO5.3
- **Activity Chosen:** Role play

- **Justification:**

Students are asked to “act out” so they get a better idea of the concepts and theories being discussed. Role-play helps the students to visualize the functioning of DNS. In addition, role play is used to involve, and motivate a classroom by putting students at the centre of the learning process

- **Time Allotted for the Activity:** 20 minutes
- **Details of the Implementation:**
 - The faculty has discussed the concept DNS on the previous day and asked willingness from the students to role play the concepts on the next day.
 - The students formed groups and prepared for the role play.
 - The students played role of working of DNS and also the two types of server iterative and recursive .
 - Students have taken the role of different sever and client.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO10	PO12
CO5	3	3	2	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO10	PO12
	3	3	3	1	2
Justification for correlation	Able to apply knowledge of Client and server model	Identify, formulate the problem of namespaces	Design solutions for public IP addresses and their associated hostnames.	Communicate effectively on activities	Recognize the need for DNS

- **Images / Screenshot of the practice:** (All the students upload the concept map in the canvas

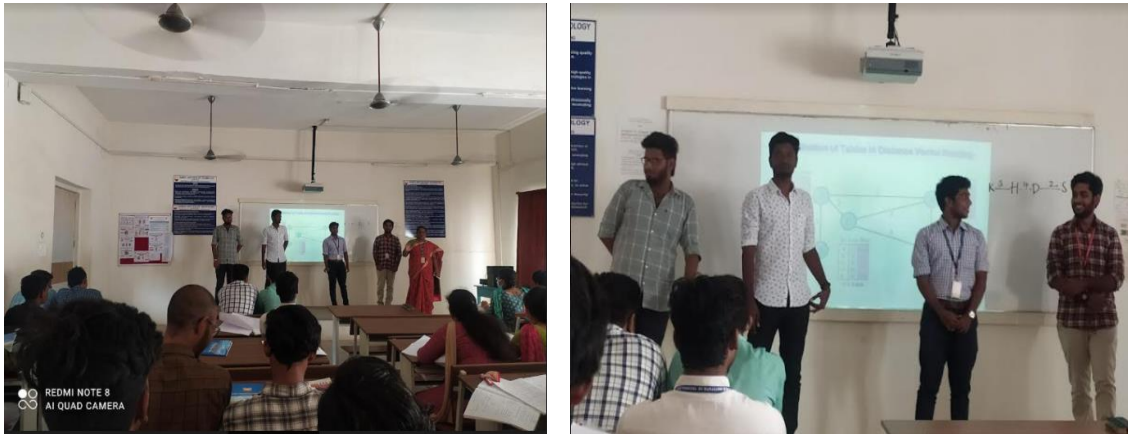

Fig 1 Active learning through role play

Reflective Critique:

Feedback of practice from students and other stakeholders:

- ❖ The demo activity increases the student's creative skills **and** communication skills
- ❖ Students get in-sight knowledge about the particular topics.
- ❖ It is helpful for improve the student's behavioral, emotional and cognitive processes knowledge.

Benefit of the practice: (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Students were able to understand and remember the concept by seeing their friends performing
- Students answered standards-aligned test questions, explained something to the instructor in person, completed an online quiz.
- The impact of innovative practice in the quiz is attached Fig. 2.

Define DNS

Discrimination Index ?

A server which stores website domain names and their IP addresses.	46 respondents	96 %	✓	96% answered correctly
A server which stores just website domain names.	1 respondent	2 %		
A server which stores networks.		0 %		
A server which stores just IP adressess.	1 respondent	2 %		

Fig 2 Quiz in Unit V

Challenges faced in implementation:

- ❖ Some students were not willing to participate which necessary for the execution of the role is playing activity.
- ❖ Less number of students was involved in the activity.
