

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering.
Academic Year: 2023 - 2024(Odd Semester)

Degree, Semester & Branch: B.E, III & ECE A

Course Code & Title: CS3353 & C Programming and data Structure

Name of the Faculty member (s): K.Jeyakarthika, AP/CSE

Active Learning method- Description

- **Unit / Topic:** Unit II/ C Programming - Advanced Features- File Handling
- **Course Outcome:** CO 2
- **Topic Learning Outcome:** TLO 6
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - In one-minute paper activity the students will be given 60 to 120 seconds to write about that topic.
 - File handling is an important topic because file can be used as a storage medium and it should be known by all students.
 - In order to have a recap of syntax for opening and closing the files and various file modes of operations this activity is chosen.
- **Time Allotted for the Activity:** 5 Minutes
- **Details of the Implementation:**
 - Faculty explained the concept of file handling in class
 - Students were asked to write the summary of file handling concepts such as fopen(), fclose(), fgetc(), fprintf(), fscanf() in a paper within a minute as shown in fig 1.
 - The faculty member collected and corrected.
 - The students who have written wrong were asked to rewrite it.

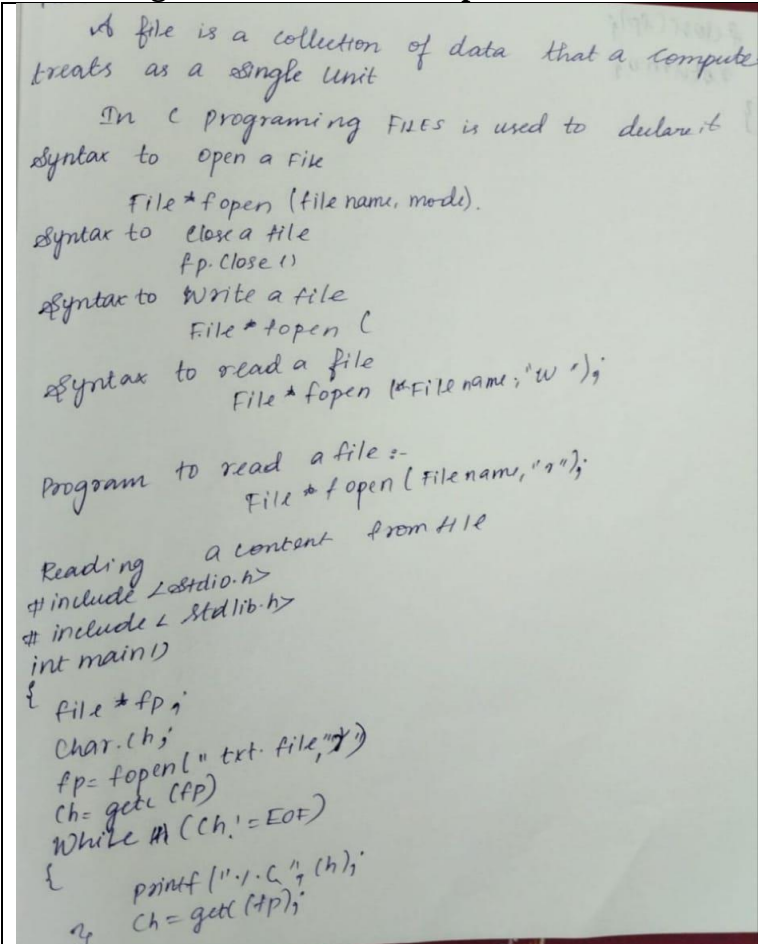

CO – PO / PSO

CO	PO1	PO2	PO3	PO9	PO10	PO12	PSO3
	3	2	1	1	2	1	2

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO10	PO12	PSO3
	3	2	1	2	1	2
Justification for correlation	Needs to learn the basic knowledge of engineering fundamentals to develop C programs using File handling	The students will be able to know the File handling are used in analysis of complex engineering problems	Interpret the complex engineering problem with the help of file handling concepts	The students able to explain and present file handling concept	The students can continued upgrading of technical knowledge using the concept of file handling.	students able to implement file handling concepts in emerging trends in ICT applications

Images / Screenshot of the practice:

A file is a collection of data that a computer treats as a single unit.

In C programming FILES is used to declare it

Syntax to open a file

```
File *fopen (file name, mode);
```

Syntax to close a file

```
fclose (fp);
```

Syntax to write a file

```
File *fopen (
```

Syntax to read a file

```
File *fopen (File name, "r");
```

Program to read a file :-

```
File *fopen (File name, "r");
```

Reading a content from file

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
    File *fp;
    char ch;
    fp = fopen("txt file.txt", "r");
    ch = getc(fp);
    while (ch != EOF)
    {
        printf("%c", ch);
        ch = getc(fp);
    }
}
```

P. Adithyan
ECE -A

FILES

Definition:

* File is a collection of records (or) data that can be stored in a computer.

* Syntax:

```
FILE *fopen (FileName, mode);
```

Open a file:

* Syntax:

```
FILE *fopen (FileName, mode);
```

Close a file:

* Syntax:

```
fclose (fp);
```

read a file:

* Syntax:

```
FILE *fopen ("FileName", "r");
```

FIGURE 1. Sample Page written by students

Reflective Critique:

- ❖ Feedback of practice from students and other stakeholders:
 - Students said that they were able to recollect and remember the file handling concepts like opening and closing files in various modes after the activity
 - Students felt it will be helpful to know about file handling.
- ❖ **Benefit of the practice:**
 - From this activity, the students can get more clarity in the particular topic.
 - Students can able to explain the concepts without any confusion
 - It can be easily tracked whether the students have understood the concept clearly or not.
- ❖ **Challenges faced in implementation:**
 - Few students made a mistake in writing the syntax of file opening and closing and mode in which the file should open or close.
 - It took much time for some students to complete the activity
