

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Odd Semester)

Degree, Semester & Branch: III semester B.E. CSE

Course Code & Title: CS8392 Object Oriented Programming

Name of the Faculty member (s): Mrs.N.Nithya

Innovative Practice Description

- **Unit / Topic:** Unit III / Throwing and catching exceptions

- **Course Outcome:** CO 3

- **Topic Learning Outcome:** TLO6

- **Activity Chosen:** Role Play

- **Justification:**

Students are asked to "act out" the concepts and theories being discussed in order to gain a better understanding of them. Role play allows students to visualize how the throwing and catching exceptions work. In addition, role play is used to empower, engage, and stimulate a classroom by putting students at the center of the learning process.

- **Time Allotted for the Activity:** 25 minutes

- **Details of the Implementation:**

- The students formed groups and prepared for the role play.
- The students enacted the role of individual blocks namely try, catch and finally and raise explicit exception using throw keyword.
- The students first enacted the normal flow of a program when there is no exception, followed by exception with no catch block but finally block, working of built in exception and user defined exceptions.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO8	PO9	PO10	PO12	PSO1	PSO2	PSO3
CO3	3	3	2	1	2	2	1	3	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1	PSO2	PSO3
	3	3	2	2	2	3	1	1
Justification for correlation	Pre-requisite knowledge	The practice is mapped to	The practice is mapped to	As the students' enact and	The students communi-	The concept in the practice is	The concept in the practice	The concept in the practice

	about Exceptions and its application is necessary and so its correlated to level 3	level 3 as it is used to solve problems addressing exceptions etc.	level 2 as it provides design solutions for complex engineering problems	explain individually, the practice is mapped to level 2	-cate the working as well as interact with other students involved in role play, the practice is mapped to level 2	highly used in software development	is used in cloud computing applications	is used in AI applications

• **Images / Screenshot of the practice:**

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students were able to identify and apply the working of throw keyword, try, catch and finally block,
- All the students enjoyed the activity.
- Students' feedback reflected that they have understood the concept.

- This activity brought out a curious child in them and provided a happy & cheerful learning environment.
- Many students responded that they wanted to learn more when the session ended and this would be a good start for continuous learning.

❖ ***Benefit of the practice:***

- This practice has made the class comparatively more interactive than the conventional practice

❖ ***Challenges faced in implementation:***

Nil
