

Department of Computer Science and Engineering

Academic Year 2022– 2023 (Odd Semester)

Degree, Semester & Branch: I Semester - B.Tech. Information Technology

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Dr.R.Venkatesh, AP(SG)/CSE

Innovative Practice Description

- **Unit / Topic: Unit III / Syntax of Conditionals and Looping statements**
- **Course Outcome: CO3**
- **Topic Learning Outcome: TLO7, TLO8**
- **Activity Chosen: One Minute Paper**
- **Justification:**
 - In one-minute paper activity the students will be given with 60 seconds to write the brief about that class session.
 - The conditional and looping statements are the very basic and important topic needed for every programming language.
 - In order to have a recap of syntax on conditionals and looping statements this activity is chosen.
- **Time Allotted for the Activity: 5 Minutes**
- **Details of the Implementation:**
 - Faculty explained the concept of the conditionals and looping statements
 - Students were asked to write the syntax of conditionals (if, if-else, if-elif-else, while and for) in a paper within a minute as shown in fig 1.
 - The faculty member collected and corrected the syntax as shown in fig 2. The students who have written wrong syntax were asked to rewrite it.
- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO2	3	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	Students will be able to remember the syntax well which is very much needed for a programming language	Students will be able to apply the syntax while approaching the problem	Students will be able to provide solution for the problem by applying correct syntax	As the student involved in the activity as an individual, the individual work skill improved	Students written/ documentation skill will be improved as they are writing the proper syntax	The problem solving skill earned through this activity helps the students in solving various problems

• **Images / Screenshot of the practice:**

Fig 1: One-minute paper activity

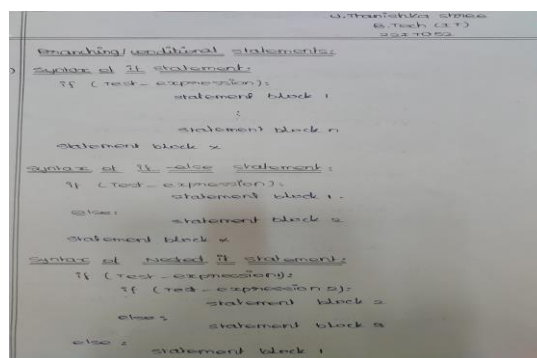

Fig 2: Sample Sheet of activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students said that they were able to recollect and remember the syntax of if, if-else, if-elif-else, while and for loop after the activity
- Students felt it will be helpful while debugging the program

❖ **Benefit of the practice:**

- Students remembrance of the syntax is improved
- Get a sense of what the students have learned, where there might be gaps in their knowledge

❖ ***Challenges faced in implementation:***

- Few students made a mistake in writing the syntax.
- It took much time for some students to complete the activity
