

Department of Computer Science and Engineering

Academic Year 2023– 2024 (Odd Semester)

Degree, Semester & Branch: VII Semester B.E. CSE

Course Code & Title: CC8791 & Cloud Computing

Name of the Faculty member : Mrs.K.Jeyageetha, AP/CSE

Innovative Practice Description

- **Unit / Topic:** Unit I / Underlying Principles of parallel and distributed computing
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO2
- **Activity Chosen:** One Minute Paper

- **Justification:**

- In one-minute paper activity the students will be given 5 minutes to write in brief about the topic discussed in the class.
- Parallel and distributed computing builds on fundamental systems concepts, such as concurrency, mutual exclusion, consistency in state/memory manipulation, message-passing, and shared-memory models.
- In order to know the student's understanding level of the concept, this activity is chosen.

- **Time Allotted for the Activity:** 5 Minutes

- **Details of the Implementation:**

Step 1: Introduction (1 minutes)

- Mrs.K.Jeyageetha explained the purpose of the one-minute paper activity.
- Emphasized that this is an opportunity for them to reflect on what they've learned and express any areas of confusion.

Step 2: Prompt (1 minute)

- Presented a clear and concise prompt related to Underlying Principles of Parallel and Distributed Computing
- Encouraged students to reflect on their own responses and consider how the activity helped them clarify their understanding as shown in figure 1.

Step 3: Writing Time (1 minute)

- Timer was set for one minute and instructed students to write their responses on the paper as shown in the figure 2.
- Encouraged them to be concise but thorough in their reflections

Step 4: Collection (1 minute)

- Collected the written responses quickly by having students pass them forward.

Step 5: Review (1 minute):

- Reviewed a few responses anonymously, highlighting common themes or

misconceptions

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO5	PO9	PO10	PSO2
CO2	3	2	1	1	1	1	2

(1 – Low

2 – Moderate

3 – High

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO2
Justification for correlation	Students will be able to apply the concept of parallel and distributed computing while working with distributed data set.	Students will be able to apply the concepts while analyzing algorithms and applications to run efficiently on multi-core processors and parallel computing clusters.	Students will be able to provide the solution for the specific public health and safety related problems by applying parallel and distributed computing concepts.	As the student involved in the activity as an individual, the individual work skill will get improved.	Students written/ documentation skill will be improved as they are writing the concept of parallel and distributed computing.	The problem solving skill earned through this activity helps the students in solving parallel and distributed computing problems.

- **Images / Screenshot of the practice:**

Fig 1: One-Minute Paper Activity

Fig 2: Sample Sheet of activity of the Student Kumar M

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students said that they were able to recollect the concepts of Parallel and distributed computing after the activity.
- Students felt it will be helpful while preparing for the exam.

- ❖ **Benefit of the practice:**

- Students remembrance of the concept is improved.
- Get a sense of what the students have learned, can able to identify students who didn't understand the concept.

- ❖ **Challenges faced in implementation:**

- Few students felt difficult in recollecting the concept they understood.
- Some students took more time to complete the activity

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

Accredited by NAAC & An ISO 9001:2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH
