

RAMCO INSTITUTE OF TECHNOLOGY
Department of Computer Science and Engineering
Academic Year: 2019 - 2020 (Even Semester)
INNOVATIVE PRACTICES

Degree, Semester & Branch: IV Semester B.E. CSE
Course Code & Title: CS8493 Operating Systems
Name of the Faculty member: Mrs. N. Nithya
Active Learning Strategy: The “One-Minute Paper”
Topic: Unit I - Revision

Date: 06.01.2020

The “One-Minute Paper”:

The “one-minute paper” may be defined as a very short, in-class writing activity (taking one-minute or less to complete) in response to an instructor-posed question, which prompts students to reflect on the day’s lesson and provides the instructor with useful feedback.

Benefit of the “One-Minute Paper”:

- Minute papers can improve the quality of class discussion by having students write briefly about a concept or issue before they begin discussing it.
- Minute papers are an effective way of involving all students in class simultaneously. It ensures equal participation of each and every class member, including anyone who may be too shy or fearful to participate orally.
- Minute papers can be used to stimulate and facilitate discussion of diversity.
- Minute papers can promote class attendance and attentiveness.

Course Outcome:

CO1: *The students will be able to explain the basic concepts, System call, structure and functions of Operating Systems.*

Goal:

Students should be able to clarify doubts in the conceptual understanding of Unit I – Operating Systems Overview as this Unit form the crux of other units.

Reason for choosing the particular topic (Method):

The “One-Minute paper” is relatively less time consuming and effective way of getting feedback from the students. The students, who are reluctant and shy to express the doubts or clarification in a topic, **reflect their difficulty** in the paper. This activity also enables the faculty member to provide clarification and additional guidance to students on the topic which has been reflected as the difficulty or unclear topic in The “One-Minute paper”.

How we implemented Reflection:

- The students were asked to name the topics that they have understood clearly in Unit I and the topics that they have doubts and need further clarification for revision.
- The faculty revises the particular topics based on the suggestion given by the students in the One-Minute paper.

Learning Outcomes:

The students were able to demonstrate conceptual understanding of Unit I – Operating Systems Overview.

Reflective Critique:

- The One-Minute paper helped me to identify the students as well the topics in the following categories and plan my next session accordingly.

Students who have clearly understood all the concepts/topics	Students who have clarification in particular topics	Topics that are not clearly understood by the students.
--	--	---

Learning Outcomes/ Program Outcomes	PO1	PO2	PO3	PO9	PO10	PO12
LO: The students were able to demonstrate conceptual understanding of Unit I – Operating Systems Overview.	3	2	1	2	1	2
