

Department of Computer Science and Engineering

Academic Year 2021– 2022(Odd Semester)

Degree, Semester & Branch: B.E – I Semester Mech

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Mrs.M.Dhivya, AP/CSE

Innovative Practice Description

- Unit / Topic: Unit V / File handling concept

- Course Outcome: CO5

- Topic Learning Outcome: TLO13

Activity Chosen: One Minute Paper

- Justification:

- In one-minute paper activity the students will be given with 60 seconds to write the brief about that class session.
- The basic file operations are open close read and write method and its syntax are recalled.
- In order to have a recap of inbuilt methods of file handling concept

- Time Allotted for the Activity: 5 Minutes

- Details of the Implementation:

- Faculty explained the concept of the File handling and various inbuilt methods.
- Students were asked to write the syntax of open and close file.
- The faculty member collected and corrected the syntax as shown in fig 2. The students who have written wrong syntax were asked to rewrite it.

- CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO5	3	1	1	1	1	1

(1 – Low

2 – Moderate

3 – High)

• **PO / PSO mapped:**

Innovative practice	Justification for correlation
PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO9	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PSO1	Students will be able to provide sustainable solution to mechanical engineering problem using the various algorithmic tools.

• **Images / Screenshot of the practice:**

Fig 1: One-minute paper activity

Fig 2: Sample Sheet of activity

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students said that they were able to recollect and remember the syntax of open and close a file in different modes.
 - Students felt it will be helpful for developing the program by own.

- ❖ ***Benefit of the practice:***

- Students remembrance of the syntax is improved
 - Get a sense of what the students have learned, where there might be gaps in their knowledge

- ❖ ***Challenges faced in implementation:***

- Few students made a mistake in writing the syntax.
 - It took much time for some students to complete the activity
