

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Odd Semester)

Degree, Semester & Branch: V Semester B.E (Common to EEE, ECE, MECH)

Course Code & Title: OIT551 Database Management Systems

Name of the Faculty member (s): Mr.R.Venkatesh, AP (SG)/CSE

Innovative Practice Description

- **Unit / Topic:** Unit I / Modeling of a library management system
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO2
- **Activity Chosen:** Mind Map
- **Justification:**
 - Mind map activity gives the graphical representation of Entity-Relationship Diagrams. It differentiates the primary key, Entity, Attributes, and Relationship clearly which will be helpful for understanding the concepts of ER Model to the students. Mind Map, makes the student to remember the topics.
 - A mind map is a diagram used to visually organize information. A mind map is hierarchical and shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added. From central idea radiate every idea that comes into our mind on that subject, dividing them into key ideas, or main brain branches. From main ideas/branches add or sub ideas, or child branches

Time Allotted for the Activity:

- **Details of the Implementation:**
 - Within 30 minutes, the teacher explains the specific principles in the classroom. The teacher instructed the students to build a mind map relevant to the issue based on the discussion and after clearing their uncertainties. Each student creates a mind map based on their level of understanding of the topic (Modeling of a library management system). This will aid students in recalling the topic of discussion on that particular day, generating fresh ideas about the topic, and being able to answer questions on the topic during a test in their own way.

• CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PSO3
CO1	2	1	1	2	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PSO3
Justification for correlation	Apply Knowledge of database fundamentals and summarize the concepts of Data Model Diagram.	Identify the needs of conceptual model of a given problem and its mapping.	Design logical structure schema and ER model diagram through data modeling tools for engineering applications.	Identify basic level of research disputes in conceptual data modeling with knowledge of underlying principles of relational model.	Identify and analyze the DBMS and conceptual data modeling techniques for developing communication system applications.

- **Images / Screenshot of the practice:**

- **Reflective Critique:**

❖ *Feedback of practice from students and other stakeholders:*

- ❖ The students confused about the different types of shapes (Entity, Attributes and Multivalued attributes, Relationships) which was explained in the class room. After that, I have chosen Mind Map as an Innovative practice method for better understanding about ER-Modeling of a library management system.

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- ❖ The Students eagerly participated in that activity and then they acquired the concept of ER-Modeling of a library management system. Due to this activity, the students were able to recall the topic and remember the important shapes and concepts easily.

❖ **Challenges faced in implementation:**

- In the mind map, some students represent very few significant points.
- The mind map's presentation ideas were not clearly portrayed.
- Some pupils found it challenging to represent their concepts in the mind map.

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

Accredited by NAAC & An ISO 9001:2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH
