

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Odd Semester)

Degree, Semester & Branch: V Semester B.E (Common to EEE, ECE, MECH)

Course Code & Title: OIT551 Database Management Systems

Name of the Faculty member (s): Mr.R.Venkatesh, AP (SG)/CSE

Innovative Practice Description

- **Unit / Topic:** Unit V / Public key infrastructures
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO14
- **Activity Chosen:** Think-Pair-Share
- **Justification:**
 - Because public key infrastructure is such an interesting and important topic, the students are eager to discuss and share their ideas. This practice assists students in gaining a thorough understanding of this idea. Students think about a topic on their own and express their thoughts with their classmates, which helps them enhance their creative thinking and oral communication abilities.

Time Allotted for the Activity:

- **Details of the Implementation:**
 - Collaborative, active learning strategy, in which students work on a problem posed by instructor, first individually (Think), then in pairs (Pair) or groups, and finally together with the entire class (Share).
 - T (Think): Teacher asks a specific question about the topic. Students "think" about what they know or have learned, and come up with their own individual answer to the question. [Takes 1-3 Minutes].
 - P (Pair): Teacher asks another question, related to the previous one, that is suitable to deepen the students' understanding of the topic. Each student is paired with another student. They share their thinking with each other and proceed with the task. [Takes 2-5 Minutes].
 - S (Share): Students share their thinking (or solution) with the entire class. Teacher moderates the discussion and highlights important points. [Takes 05-10 minutes].

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PSO1
CO5	2	1	1	2	1

(1 – Low 2 – Moderate 3 – High)

- **Images / Screenshot of the practice:**

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- ❖ Most of the students actively participated and enjoyed. Students were given a solution with various formats.

- ❖ Bright students enjoyed with peer learning.

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Students are actively engaged.
- Students learn from each other.
- Makes class interactive.
- Builds a friendly, yet academic atmosphere.
- Includes all the students in the teaching-learning process.

- ❖ **Challenges faced in implementation:**

- Students were not aware of TPS even though made an announcement and posted the content of TPS in the course web site.
- Slow learners were not interested to participate in TPS.
- Noise level of the class room goes up and a transition was needed to get back on the topic.
- It was hard to keep every student on task.
- It took a longer time than other strategies.
