

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019 - 2020 (Even Semester)

Degree, Semester & Branch : VIII Semester B.E CSE

Course(Subject) Code & Title : CS6008 Human Computer Interaction

Name of the Faculty member : Mrs.M.Swarna Sudha

Innovative Practice: Reflection

Topics: Ergonomics (previous lectures, if any)

Objectives:

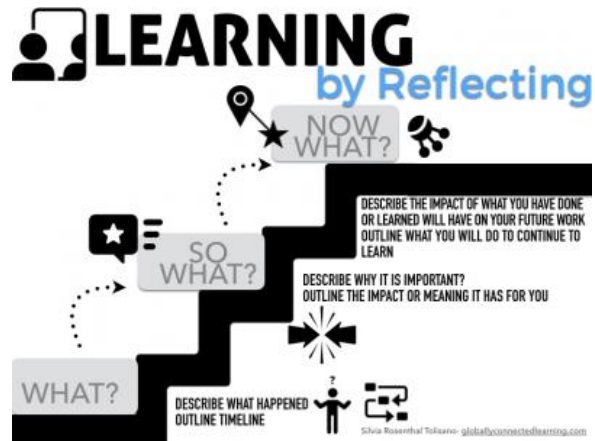

O1: To encourage the students to come up with more questions and to explore on the topic that they are not clear.

Justification for choosing the particular topic: Ergonomics is the important concepts of HCI .The prime objective of Reflection is to make the students write their doubts in a paper on topics which they are not clear, so as the teacher can discuss and clarify the concepts that are not understood by the students. In order to address the doubts and to know the level of understanding of the students, they were insisted to fairly to describe the concepts that they didn't understand well.

Activity on Reflection: After part of the session is completed, in order to speak the doubts and to know the level of understanding of the students, they are insisted to honestly describe the concepts that they didn't understand well. The students wrote their doubts and topics which they are not clear. The papers are collected by the course instructor and discussed all the doubts in next class session and make them understand.

Observations made: • The topics in which students have some doubts or not clear:

- Example of ergonomics
- Why ergonomics so important?
- Major areas of Ergonomics
- What are Ergonomic risk factors?
- Ergonomic principles

Action taken:

- ♣ Description is written in all the students' paper and common doubts among students are discussed and explained in the next lecture session.

What is Ergonomics?

Ergonomics is the process of designing or arranging work places, product and system so that they fit the people who use them.

Mam, Tell where it is used?

Whether it is useful to get a job or not we know?

Good You can take this as Profession.

Reg No : 953616104034
Name : A. Nishanjana Devi

I understood what is ergonomics and its types.

Tell me about the Principles of ergonomics and also tell why is ergonomics so important?

Make employees more comfortable.

Reg No: 953616104043.
Name: R. Landhiya.

Ergonomics

I understood the topic. But I don't know its applications in real time.

What are the application of Ergonomics?

V-Good

Office
Industry
Information Technology
Military design.

N. Shivasankar

953616104050

Ergonomics.

study of physical characteristics

Tell me the major areas of Ergonomics

Physical
Cognitive
Organizational.

Reflection critique

Observation Made:

- Some of the students unaware of the basic concepts of HCI, so felt very difficult to understand Ergonomics and its styles.
- While most of the student were able to reflect on their learning some of the student had confusion in the concept
- Students were able to assess themselves when they were able to remember or not recall independently.
- The reflection is conducted after the discussion of the topic and so there was shortage of time.

Post Implementation:

- Activity helps the teacher to analyse, evaluate and improve their own learning.
- Reflection helped me to identify the students and level of understanding , it helps to me to plan my next session accordingly
- Students learned a few things individually that leads to self-learning. They also actively involved in this session

Relevance Mapping- This activity helps in attaining the following objectives-PO mapping

Course outcome/Programme outcome	PO1	PO2	PO3	PO4	PO9	PO10	PO12
To encourage the students to come up with more questions and to explore on the topic that they are not clear.	3	2	2	2	3	3	3
