

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering Academic Year 2022 – 2023 (Odd Semester)

Degree, Semester & Branch: V Semester B.E. ECE- 'A' Section

Course Code & Title: CS8392 Object Oriented Programming

Name of the Faculty member (s): Dr.S.Erana Veerappa Dinesh, AP/CSE

Innovative Practice Description

Unit/Topic: Unit IV / Generic class and methods

Course Outcome: CO4

Topic Learning Outcome: TLO11

Activity Chosen: Think Pair Share

- **Justification:**

The understanding of generic class and methods is essential for developing the generic programming. Hence the students have to think the way of writing program using generic methods. Hence this activity is chosen to make them think and communicate whether their thought process is correct or not with their neighbors.

- **Time Allotted for the Activity:** 30 Minutes

- **Details of the Implementation:**

A Collaborative, active learning strategy, in which students work on a question posed by instructor, first individually (Think), Write in a paper, then work in pairs or groups (Pair) to solve the problem, and finally share their solution with the entire class (Share).

- **Think** – Write- Students were provided with questions on generic methods. The student has to think individually and write the answer in a paper.

- **Pair**- After writing the answers, the students were allowed to discuss with neighbor and justify the resultant answer to each other. The pair with neighbor was shown in Fig.2

- **Share** - Once the conclusion is made between the pair, then it is to be shared among the whole class by any of the student from the team and it is shown in the Fig 2.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO8	PO9	P10	PSO1	PSO2	PSO3
CO 5	3	3	2	1	2	2	2	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PSO1
	3	3	2	2	1
Justification for correlation	The students apply the knowledge of generic methods	The students evaluate given problem statements and identify solutions	The students evaluate given problem statements and identify solutions	The students demonstrate problem-solving skills as a team.	The students use the generic methods that can accept any type of arguments to solve problems

- **Images / Screenshot of the practice:**

Figure 2 Sample Screen shots

Reflective Critique:

❖ Feedback of practice from students and other stakeholders:

- Some of the students write answers for the questions easily and share their ideas with others.
- Some of them need more explanation and examples to get clarity on the generic methods.

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

It helps the students to share ideas with classmates and builds oral communication skills. They completed the task by coordinating with each other and get more confidence, clear understanding in this topic when discussing with their peers.

❖ **Challenges faced in implementation:**

- The students who didn't understand the concept clearly is not able to complete it within time.
- Making all the students to involve and present actively in this activity is a challenging.
