

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2023 – 2024 (Odd Semester)

Degree, Semester & Branch: I Semester B.E. CSE-‘B’

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit III / Iteration: state, while, for

Course Outcome: CO 3

Topic Learning Outcome: TLO 8

Activity Chosen: Think Pair Share

Justification:

- The activity aims to assess students' individual comprehension by encouraging independent thought and fostering knowledge-sharing among peers. In Python programming, understanding concepts such as state, while, and for loops is crucial for comprehending program execution flow.
- The "think-pair-share" activity provides a platform for students to demonstrate their individual understanding while also benefiting from collaborative learning.
- **Time Allotted for the Activity:** 15 minutes

Details of the Implementation:

- The instructor introduced specific concepts or topics in the classroom within a 35-minute timeframe, presenting a program to the students.
- Students were given 1-5 minutes to independently think of their understanding of the iterative process.
- Following this, the instructor encouraged students to pair up with nearby classmates to discuss their program solutions, fostering interaction and deepening comprehension (6-10 minutes).
- Students then shared their solutions with the entire class during the last segment of 11-15 minutes.
- The instructor played with one of the students (Saravanan A) and also knew how much the student grasped.
- The instructor moderated the discussion, emphasizing key points.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO 3	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
	2	1	1	1	1	1
Justification for correlation	It includes logical thinking and makes the student able to think about problem-solving approaches.	Students were able to approach the program by applying what they learned.	Able to provide a solution for the problem using the looping statements	As students were involved in the activity as a team, their teamwork skills improved.	Students communication skill will be improved as they are facing audience and communicating the activity	Students communication skills will improve as they are facing the audience and communicating the activity.

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

The students felt that this activity helps them to remember the concepts and it will be very helpful to correct their mistakes while sharing the program solution to the other students.

Benefit of the practice:

- From this activity, the students can get more clarity in the particular topic.
- Students can able to explain the concepts without any confusion.
- This practice has made the class more interactive than the conventional practice

Challenges faced in implementation:

- All the students were unable to complete the task within allotted time
- Not able to make all the students to involve in this activity
- Few students found it difficult to solve the program individually. After discussion, they felt easy.
