

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Odd Semester)

Degree, Semester & Branch: I Semester B.E. ECE-‘B’

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit V / Files and exceptions: text files, reading and writing files

Course Outcome: CO 5

Topic Learning Outcome: TLO 13

Activity Chosen: Flash Card

Justification:

- Flash cards is the tool for the learners and the card hold the information. This activity helps the students to recall the concepts. To make the students recall the concept in detail the activity was conducted.
- Time Allotted for the Activity:** 15 minutes

Details of the Implementation:

- Instructor explained the particular concepts/topic in classroom within 35 minutes. Instructor gave a program to the students.
- Two types of Flash cards were prepared. One containing question and other card containing answers.
- Questions and answers were prepared in a card.
- Question cards were distributed to certain group of students and answer cards were distributed to few group of students.
- Student who is having the question read out the question. Other students listed to the question and found out the answer. Student who is having the respective answer card explained the answer for the question to the entire class

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PSO1	PSO2
CO 4	2	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PSO1	PSO2
	2	1	1	1	1
Justification for correlation	Students can able to apply basic knowledge of engineering in different file operations.	Able to identify relevant file handling applications to solve the simple and complex engineering problems	Able to interpret the complex engineering problems with the help of files in python	Students can be able to access the files stored in cloud using python program to solve the emerging information and communication engineering problems.	Students can handle the files using python programs required to solve the problem in embedded technologies.

• **Images / Screenshot of the practice:**

Fig:2 Students involvement in Flash Card Activity

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- This helped the students in recalling the topic taught on that day.
 - Students said that the flash card activity is very joyful to recollect the concepts.
 - They asked to conduct more of the similar activity during class which help us to listen the class without getting bored.

- **Benefit of the practice:**

- Based on the activity student's felt that it was easy to understand the concept.
 - Most of the students were actively participated and enjoyed among their group members once they answered correctly.

- **Challenges faced in implementation:**

- Few students found it difficult to find the corresponding flash card which containing answer.
 - Some students were hesitated to express the relevant answers to the question card.
