

Department of Computer Science and Engineering

Academic Year 2022– 2023 (Odd Semester)

Degree, Semester & Branch: I Semester – B.Tech. Information Technology

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Dr.R.Venkatesh, AP(SG)/CSE

Innovative Practice Description

- **Unit / Topic:** Unit II / Precedence of Operators and Circulate the Values of N Variables
- **Course Outcome:** CO2
- **Topic Learning Outcome:** TLO5
- **Activity Chosen:** Think Pair Share
- **Justification:**
 - Think pair share activity involves the students to think individually and to share the knowledge with classmates. In python, program Circulate the Values of N Variables to understand the list and its operations and precedence of operators helps in solving the expressions. The student's individual solving capability can be tested and the gained ideas can be shared by think-pair-share activity
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
 - Faculty explained the concept of the precedence of operator and basics of List.
 - Expressions containing different precedence were displayed.
 - Students were asked to write the answer for the expressions by evaluating them using the precedence table individually within given time as shown in Fig 1.
 - Then the students were asked to discuss the answers with their neighbors as shown in Fig 2
 - Few students were called in front of the class and asked to share the correct answers after discussion as shown in fig 3.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO2	3	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	It involves logical thinking and make the student able to think about problem solving approach	Students will be able to approach the problem by applying the types of operators they learnt	Students will be able to provide solution for the problem using the precedence chart	As the student involved in the activity as team, the team work skill improved	Students communication skill will be improved as they are facing audience and communicating the activity	The problem solving skill earned through this activity helps the students in solving various problems

- Images / Screenshot of the practice:

Fig 1: Students thinking about the given problem

Fig 2: Students pair with neighbors and discuss answers

Fig 3: Student share the knowledge to whole class

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- The students felt that this activity is so interesting and helps them to remember the concepts of operators.
- They said it will be very helpful when preparing for exams

- ❖ ***Benefit of the practice:***

- This practice helps the students to remember the concept as they applied what they studied
- It leads to peer to peer learning
- It helps in improving the communication by effectively delivering the things they learnt

- ❖ ***Challenges faced in implementation:***

- All the students were unable to complete the task within allotted time
- Few students found it difficult to solve the expressions individually. After discussion, they felt easy
- Unable to complete the activity within planned time
