

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019-2020 (Even Semester)

INNOVATIVE TOOLS

Degree, Semester & Branch: VIII Semester B.E. Computer Science and Engineering

Course Code & Title: GE6075 Professional Ethics in Engineering

Name of the Faculty member: Mr.R.Venkatesh, AP(SG/CSE)

Innovative Tool: Think – Pair – Share (TPS)

TOPIC: Introduction to Yoga and meditation for professional excellence and stress management.

Date: 12.01.2020

THINK – PAIR – SHARE (TPS)

1.1 Learning Outcomes

1. To enhance communication and ethical thinking among the students.
2. To make the students learn human values and get inspired by Yoga and Meditation.

1.2 Justification for choosing the topic

The topic is Yoga and Meditation, the understanding and implementing of yoga and meditation is the essential requirement for every individual in day to day life. When most people think of ethics (or morals), they think of rules for distinguishing between right and wrong. Although most people acquire their sense of right and wrong during childhood, moral development occurs throughout life and human beings pass through different stages of growth as they mature. Ethical norms are so ubiquitous that one might be tempted to regard them as simple commonsense.

Many people report positive health effects from practicing yoga and meditation, and experience both mental and physical benefits from these practices. Students can think individually about the topic and working as a group to share their ideas that improve the ethical thinking, human values, oral communication skills and implementing the yoga and meditation in real time(life).

1.3 Implementation:

Collaborative, active learning strategy, in which students work on a problem posed by instructor, first individually (Think), then in pairs (Pair) or groups, and finally together with the entire class (Share).

- **T (Think):** Teacher asks a specific question about the topic. Students "think" about what they know or have learned, and come up with their own individual answer to the question. [Takes 1-3 Minutes].
- **P (Pair):** Teacher asks another question, related to the previous one, that is suitable to deepen the students' understanding of the topic. Each student is paired with another student. They share their thinking with each other and proceed with the task. [Takes 2-5 Minutes].
- **S (Share):** Students share their thinking (or solution) with the entire class. Teacher moderates the discussion and highlights important points. [Takes 05-10 minutes].

Benefit of TPS

- Students are actively engaged.
- Students learn from each other.
- Makes class interactive.
- Builds a friendly, yet academic atmosphere.
- Includes all the students in the teaching-learning process.

How we implemented Think – Pair – Share

Think:

The instructors posed a question to learn and explain the **Introduction to Yoga and meditation for professional excellence and stress management**. The students were grouped and discussed about the same.

Pair:

The students were asked to discuss their neighbour's to understand the given concept. The students discussed and learn by themselves or with their neighbours to complete the task.

Share:

Finally, the students from group presented their concepts and participated in the discussion.

Glimpse of TPS

1.4 Reflective report

1.4.1 Pre-implementation Reflection

1.4.1.1 Challenges:

- Students were not aware of TPS even though made an announcement and posted the content of TPS in the course web site.
- Slow learners were not interested to participate in TPS.
- Students make noise during the activity.

1.4.1.2 Steps taken for address the challenges

- Motivated and mentor the slow learners to involve activity effectively by means of addressing the benefits of TPS and creative thinking.
- An announcement was made for conducting Think-pair-share activity in the previous lecture. The students got awareness about the activity before coming to the class through the announcement

1.4.2 Post implementation reflection.

- Most of the students actively participated and enjoyed. Students were given a solution with various formats.
- Bright students enjoyed with peer learning.

Relevance of Program Outcomes

Course Outcome	Programme outcome											
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	1	-	-	-	-	1	-	3	1	2	-	2
CO2	1	-	-	-	-	2	-	3	1	2	-	2
