

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CS8691 Artificial Intelligence

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit III / Events

Course Outcome: CO 3

Topic Learning Outcome: TLO 9

Activity Chosen: One Minute Paper

Justification:

- The topic “Events” contains event calculus and the students need to learn more predicates about the concepts. This activity makes the students to get a sound knowledge in this concept. Minute paper is a short writing assignment in the classroom in which students respond to questions posed by the teacher about the subjects being covered in class. These questions encourage students to think about the lessons they've studied and provide feedback on their understanding. This aids teachers in preparing for the next class. Its key benefit is that it provides immediate feedback on whether the instructor's main idea and the students' main idea are the same.
- Time Allotted for the Activity:** 10 minutes

Details of the Implementation:

- Instructor explained the particular concepts/topic in classroom within 40 minutes.
- Based on the discussion the students were instructed to write about the topic addressed in class at the end of the class.
- The students expressed what they understood in the class.
- This practice demonstrates whether students have grasped the content and are actively participating in the lesson.

CO – PO / PSO mapping:

CO	PO1	PO2	PSO1
CO 2	2	2	2

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PSO1
	2	2	1
Justification for correlation	Students can able to represent knowledge by using basics mathematics, science and engineering principles	First order and predicate logic can be apply to solve the simple and complex engineering problems	Students can be able to apply reasonable strategies of events to solve complex computation task.

• **Images / Screenshot of the practice:**

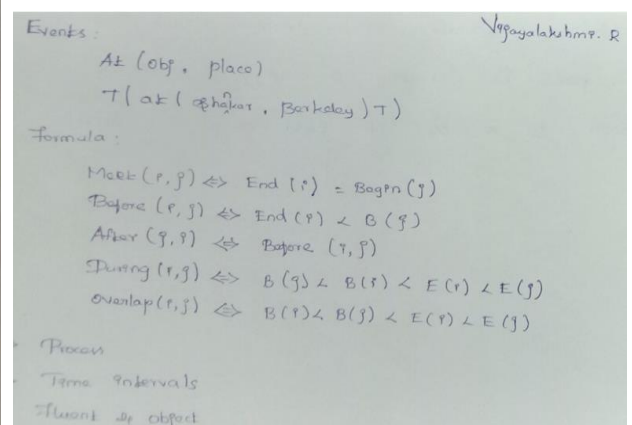

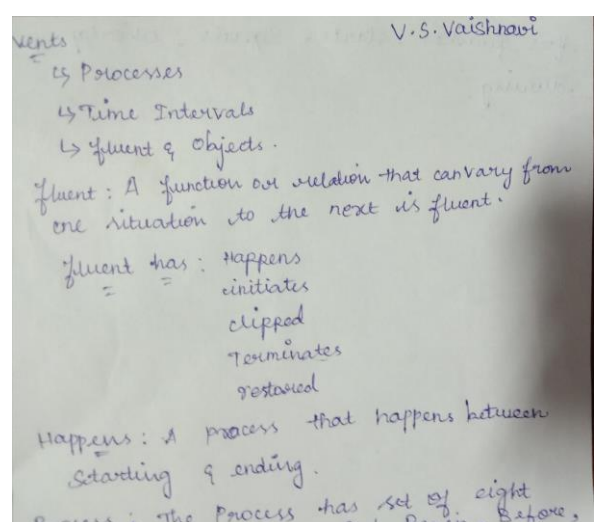

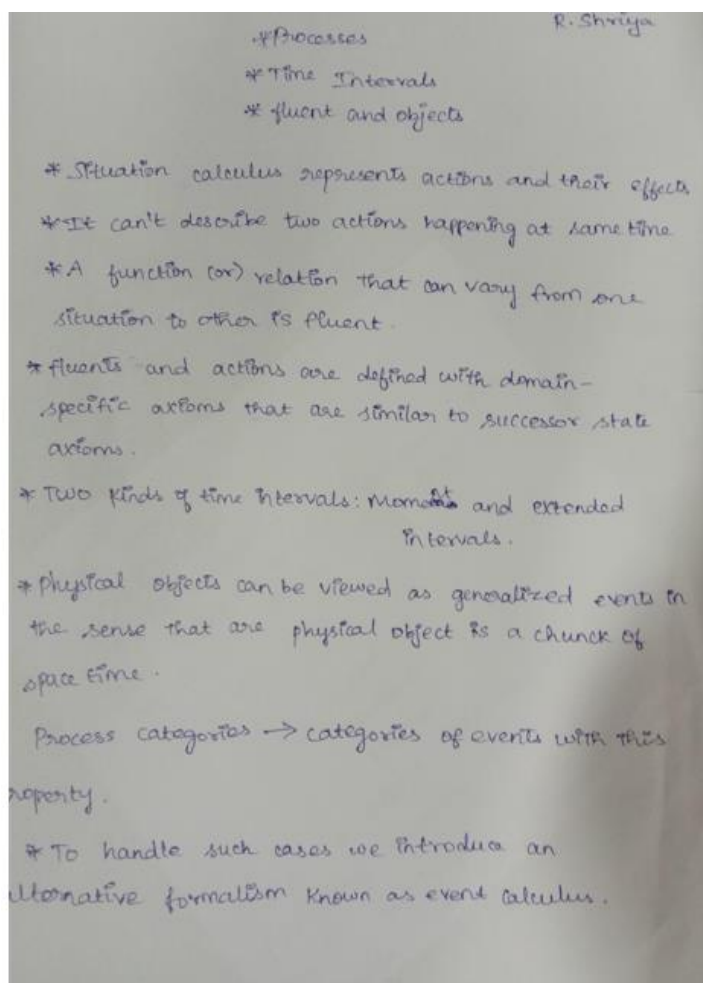

Figure:1 Glimpses of One Minute Paper

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students grasped the topic, as evidenced by their responses to the questions I posed during the discussion session.

- ❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- From this activity, the students can get more clarity in the particular topic.
 - Students can able to explain the concepts without any confusion.

- ❖ ***Challenges faced in implementation:***

- Few students hesitated to present the concepts doubting about their correctness in that concept.
