

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2023 – 2024 (Odd Semester)

Degree, Semester & Branch: V Semester B.E. CSE

Course Code & Title : CCS339 Cryptocurrency and Blockchain technologies

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit I / Introduction to Blockchain

Course Outcome: CO 1

Unit Learning Outcome: UO 1a,1b,1c

Activity Chosen: Mind map

Justification:

1. Mind Map

- A mind map is a visual representation of thoughts and ideas. It is a visual thinking tool that aids in data organization. It fastly writes down ideas. This activity helps the student to identify theoretical concepts in the image and aid in easy recall for their exams.
- **Time Allotted for the Activity:** 20 minutes

Details of the Implementation:

- The instructor revised the unit 1 in the classroom on 24.08.2023.
- Based on the discussion and after clarifying the students' doubts, the teacher instructed the students to create a mind map related to the topic in 20 minutes.
- Based on their level of understanding, each student created a mind map. The sheets were collected from the students by the instructor.
- This helped students recall the topic taught that day, generate new ideas about the topic, and answer questions about the topic with ease.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PSO1
CO 1	2	2	2	1	1

(1 – Low 2 – Moderate 3 – High)**PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PSO1
	2	2	2	1	1
Justification for correlation	Students will acquire in-depth knowledge of the abstract models of blockchain technology.	Students will analyze blockchain use cases and scenarios	Students will design and develop blockchain-based solutions	Students will investigate complex problems related to abstract blockchain models, exploring potential improvements and innovative approaches.	Students will be able to apply their knowledge of cryptography to the development of software.

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Sundaramahalingam P informed the instructor that he found it a bit challenging to create a mind map on paper. It might be easier with digital tools.
 - Subiksha V told the teacher that the time should have been allocated for group discussions and collaboration.

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- This activity enables students to recall only the most important information using key words, and then visually connect facts and ideas.
 - It made key note making easier to students, as it reduces pages of notes into one single side of paper. Also mind map made slow learners to remember the information more quickly.
 - From this activity, the students can get more clarity in the particular topic.

- ❖ **Challenges faced in implementation:**

- Some of the students represent very less key points in the mind map.
 - It might be challenging to keep students engaged and motivated during the mind map activity.
