

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CS8691 Artificial Intelligence

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit IV / Architecture for Intelligent Agents

Course Outcome: CO 4

Topic Learning Outcome: TLO 10

Activity Chosen: Flash Cards

Justification:

- Flash cards is the tool for the learners and the card hold the information. The topic “Architecture of Intelligent agent” has more sub topics and under each sub topic the students need to learn more concepts. This activity helps the students to familiar with the concept in detail and also recall the concepts.
- Time Allotted for the Activity:** 15 minutes

Details of the Implementation:

- Instructor explained the particular concepts/topic in classroom within 35 minutes. Instructor gave a program to the students.
- A flash card is a method in which the question and corresponding answer is in separate card.
- Two types of Flash cards were prepared. Question and answer of the card is prepared based on topic taught by the course instructor in the class on a particular day. One containing question and other card containing answers.
- Question cards were distributed to certain group of students and answer cards were distributed to few group of students.
- Once the question will be asked by one of the students in the class from the card, student members of group in the class should identify correct answer cards and explain the answer in front of the class.
- This will help the students to revise the particular topic.

CO – PO / PSO mapping:

CO	PO3	PO4	PO9	PSO1
CO 4	2	2	2	2

(1 – Low 2 – Moderate 3 – High)**PO / PSO mapped:**

Innovative practice	PO3	PO4	PO9	PSO1
	2	2	2	2
Justification for correlation	Students can able to apply Agent architecture to design solutions to complex engineering problems.	Students can be able to choose the proper intelligent agent to interpret the data to provide valid conclusion	The students could be able to present results as a team, with incorporation of helps from all individual efforts.	Students can be able to apply intelligent agent architecture to solve complex computation task.

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- This helped the students to identify the definition and also recalling the topic taught on that day.
- It motivates the students to identify the term associated with each definition and questions.
- Students said that the flash card activity is very joyful to recollect the concepts.
- They asked to conduct more of the similar activity during class which help us to listen the class without getting bored.

❖ **Benefit of the practice:**

- Based on the activity student's felt that it was easy to revise the concepts.
- Most of the students were actively participated and enjoyed among their group members once they answered correctly.
- The impact of innovative practice in the quiz is attached Fig. 3. herewith.

Fig.3: Quiz Score in the topic Architecture for Intelligent Agents

❖ **Challenges faced in implementation:**

- Few students found it difficult to understand the questions clearly and the instructor instructed the questioner to repeat the question once again clearly to make the students for clear understanding of question.
- Some students were hesitated to express the relevant answers to the question card.
