NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE, MECH and CIVIL

Department of Computer Science and Engineering

Academic Year: 2025 - 2026 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CCW332 & Digital Marketing

Faculty member (s): Mrs. P. Devisri, AP/CSE

Innovative Practice Description Unit Topic: Unit II / SEO and Keyword Strategy

Course Outcome: CO 2

Topic Learning Outcome: 2a

Activity Chosen: User Objective Mapping – Keyword Strategy

Justification:

Search Engine Optimization (SEO) and Keyword Strategy are critical components of digital marketing, enabling businesses to improve online visibility and attract the right audience. The User Objective Mapping – Keyword Strategy activity encouraged students to align business goals with user search intent by identifying short-tail and long-tail keywords, performing competitor analysis, and applying those keywords across platforms. This hands-on activity helped students understand how SEO works in real-world scenarios and how keyword optimization drives organic traffic and conversions.

Date of Activity: 03/02/2026

Time Allotted for the Activity: 35 minutes

Details of the Implementation:

- At the beginning of the session, the faculty introduced the concept of Keyword Strategy and SEO, explaining how identifying user intent and selecting appropriate keywords can improve search rankings and drive relevant traffic.
- Students were divided into small teams to develop a keyword strategy for a chosen bakery brand.
- S. Lakshitha and M. DurgaDevi Team (Figure 1 & Figure 2) – The team developed a comprehensive keyword strategy for their brand, Sweet Bite Cakes, a bakery focusing on online orders and walk-in customers.
- The team identified the following key steps:

1. Identify Goals:

1. Increase online orders
2. Get more walk-in customers

2. Understand the Target Audience:

- Students, families ordering birthday cakes

3. Keyword Research:

- Bakery near me
- Birthday cake shop
- Best Bakery

4. Long-Tail Keywords:

- Eggless cake delivery near me
- Best chocolate cake shop
- Cake flavours near me (shop)

5. Competitor Check:

- Check their bakery website
- Updating the keywords in order to stay ahead of our position

6. Keyword Optimization – Platforms Used:

- Instagram captions
- Product description
- Website

7. Content Creation:

- Delicious cakes
- Yummy cakes and Bakery near me
- Flexible prices with combos

8. Monitoring and Refinement:

- Observing which keywords work and which do not work from the customer's view

9. Diversifying Keyword Usage:

- Cake, Bakery, Birthday, Celebration, Anniversary party cakes

10. Staying Updated – Seasonal Keywords:

- Christmas, Birthday, Anniversary
- To validate their keyword choices, the team used Google Keyword Planner tool (Figure 3). They searched for their long-tail keywords such as "eggless cake delivery near me" and "best chocolate cake" and found that their predicted keywords were accurate — both appeared in the planner results with real search volume data (10–100 and 1k–10k average monthly searches respectively), confirming that the students had correctly identified high-relevance keywords for their bakery brand.
- The team briefly presented their User Objective Mapping and Keyword Strategy, explaining how each step contributes to improved SEO performance and organic search visibility for their bakery brand.

CO – PO / PSO mapping:

CO	PO1	PO2	PO10	PSO1
CO 2	2	2	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO10	PSO1
	2	2	1	1
Justification for correlation	Students applied SEO keyword strategies using analytical and strategic thinking.	Students analyzed user search behavior and selected appropriate keyword categories.	Students improved communication skills by presenting keyword strategies clearly.	Students gained real-world exposure to SEO keyword planning techniques.

Reflective Critique:

Feedback of practice from students and other stakeholders:

- Students found the keyword strategy activity practical and engaging, as it connected SEO theory to real bakery brand scenarios.

- The step-by-step objective mapping format helped students understand how search intent aligns with keyword selection.
- Students felt confident applying keyword research concepts to real-world business problems.
- Peer discussions and competitor analysis exercises enhanced critical thinking and clarity of thought.

Benefit of the practice:

- Improved understanding of SEO keyword strategy and user objective mapping.
- Enhanced analytical and digital marketing planning skills.
- Encouraged teamwork and collaborative learning.
- Bridged the gap between theory and practical SEO application.

Challenges faced in implementation:

- Some students needed guidance to differentiate between short-tail and long-tail keywords.
- Managing time effectively for competitor analysis within a single session was challenging.
