

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019 - 2020 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CS8602 Compiler Design

Type of Activity: Reflections

Topic: YACC

Date: 11.02.2020

Objectives:

O2: To expose the students to learn various parsing techniques.

Justification for choosing the particular topic:

YACC is Yet Another Compiler Compiler is an important topic in compiler design. It is a tool to implement LALR parser. To program in compiler for YACC felt difficult first time for students. In order to address the doubts and to know the level of understanding of the students this activity was chosen. If the students hesitate to ask their doubts in the class room they can utilize this type of learning activity.

Why is reflection important in teaching?

Reflections will help the students to realize and self-evaluate on the understanding level and also will enable the teachers to provide additional guidance to students who have experienced difficulty in reflecting the concept.

Activity Description:

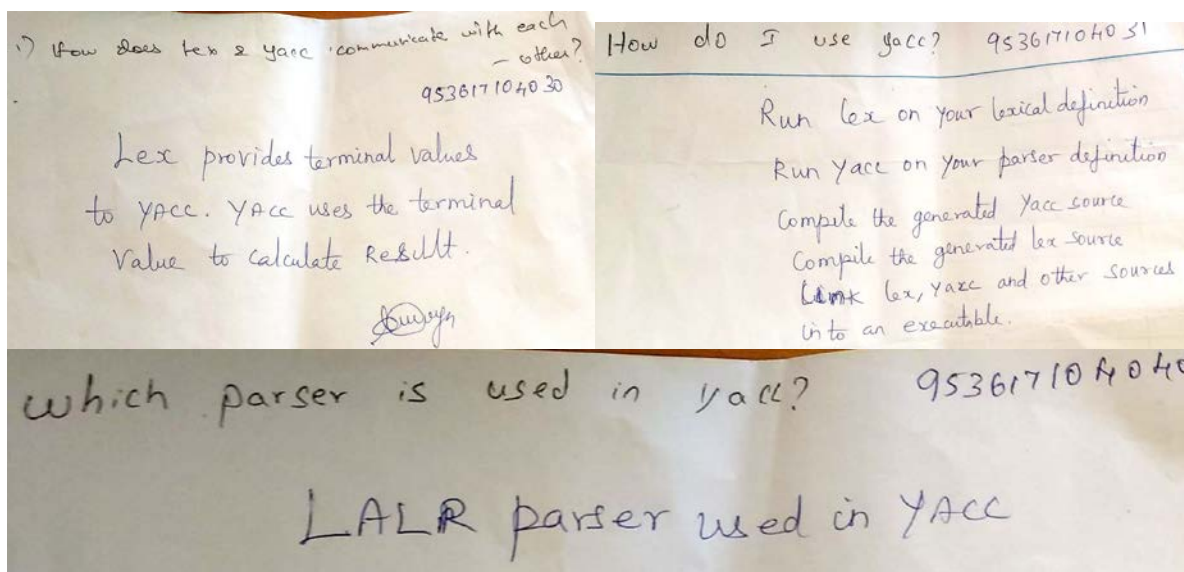

- After a part of the lecture is completed, course instructor asked the students to honestly describe the concepts that they didn't understand well.
- The students wrote their doubts and topics which they are not clear.
- The papers are collected by the course instructor and discussed all the doubts in next class session and make them understand.

Reflection critique

Observation Made:

The topics in which students have some doubts or not clear

- How to use YACC program?
- What are the files generated by the YACC?
- Which parser used in YACC?
- How does LEX and YACC communicate with each other?

Post Implementation:

- Most of the students actively participated except few students are not participated. The participated students were raised intelligent doubts.
- Some of the students were not interested to participate in reflection activity.

Steps taken:

- Motivate the students those who are not involved in the activity effectively by means of addressing the benefits of reflections and creative thinking.
- Additional video is posted for the students to understand the concept of YACC.
- Additional coaching is implemented for same topic in Compiler design Laboratory class.

Relevance of Program Outcomes

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
05	3	2	2						2	3		3
