Accredited UG Programs: CSE, EEE, ECE and MECH

About The Department

The Computer Science and Engineering department started in the year of April 2013 with a vision to become a Centre of Excellence by making the students to compete and adapt to the changing pace of the industries.

The Department strives with an outlined vision in producing socially responsible and employable engineers. It has a team of well qualified and highly experienced faculty members and technical staff who deliver their skills to the students through 360 teaching-learning environment which includes deployment of Moodle, video tutorials from NPTEL, spoken tutorial which are all streamlined with NMEICT

Some of the bright students are pursuing MITx courses for enhanced learning. The faculty members impart knowledge through curriculum based formal education and industry focused informal education which enhances the aptitude and reasoning skills of the students to make them readily employable.

The Department has modern, well equipped and updated infrastructure facilities to achieve the target of making students readily employable.

The Computer Centers provide Central Computing facility across 1000+ nodes which are backboned by IBM 8 Blade Servers and Juniper Networks. Nodes have communication outlet with a speed of 1200 Mbps dedicated leased line facility which can be accessed in both wired and Wi-Fi environment.

The department procured all latest software including Oracle 11g, Rational Rose, Microsoft Open Value Subscription through Microsoft Campus agreement to enable the students to develop their practical skills.

1.Vision

Excellence in Computer Science and Engineering by offering quality technical education catering to research and development.

2.Mission

Equip the department with modern infrastructure for high quality education and carrying out research in emerging technologies in Computer Science and Engineering
Expose the students, faculty and staff to a globally competitive learning experience.
Motivate students to realize the responsibility of being professionally competent computer technocrats to serve the society by inculcating Ethical and Environmental aspects.

3.Program Educational Objectives (PEOs)

Graduates will have successful career in IT and related industries or pursue higher education and research or evolve as entrepreneurs. Graduates will have the ability and attitude to adapt to emerging technological changes. Graduates will excel as socially committed engineers with high ethical values, leadership qualities and empathy for the needs of society.

4.Program Specific Outcomes (PSOs) After successful completion of the degree, the students will be able to:

Excel in software development including mobile technologies to solve complex computation task with soft skills
Apply appreciable knowledge of IoT, Cloud Computing and Cyber Security to develop reliable IT solutions.

Exhibit proficiency in Artificial Intelligence and Big Data Analytics for providing solutions to real world problems in Industry and Research establishments.

5.PROGRAM OUTCOMES (POs) Engineering Graduates will be able to:

i) Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

ii) Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

iii) Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health

and environmental considerations.

iv) Conduct investigations of complex problems: Use research-based knowledge and research safety, and the cultural, societal and methods including the design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions

v) Modern tool usage:

Create, select and apply appropriate techniques, resources and modern engineering and IT Tools including prediction and modeling to complex engineering activities with an understanding of the limitations

vi) The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

vii) Environment and sustainability :

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

viii) Ethics : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

xi) Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

x) Communication:

Communicate effectively on

complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

xi) Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to ones own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

xii) Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)

After successful completion of the degree, the students will be able to:

Excel in software development including

mobile technologies to solve complex computation task with soft skills.

Apply appreciable knowledge of IoT, Cloud Computing and Cyber Security to develop reliable IT solutions.

Exhibit proficiency in Artificial Intelligence and Big Data Analytics for providing solutions to real world problems in Industry and Research establishments.

CENTIZEN DRIVE INTERVIEW EXPERIENCE

1st round

The first round was an Coding test

The Coding test consists of 5 questions with a time limit of 90 minutes

List of programming questions asked in centizen

- *Palindrome*
- *Row sorting & column sorting in Matrix*
- *Array programs*
- *Searching algorithms*

Number pattern or Star pattern based programs

At the beginning, I focused more on basic coding questions

As time went on, I shifted to solving less complex coding questions

In the final 20 minutes, I concentrated more on Complex questions. The results were announced after 2 weeks, and regarding to second round they intimate in our college.

Out of 47 students, only 18 were selected for the next round

2nd round

The second round was Technical discussion and group discussion

There were 4 panel members, and I was a 7th person in that interview, which included 18 students, myself included

CENTIZEN DRIVE INTERVIEW EXPERIENCE

The Technical Discussion:

Web Development Panel:

- *What is HTML?*
- *What is CSS?*
- *How do you identify the Javascript in html file?*
- *What is Marquee?*
- *How to create a table?*

Object oriented programming panel:

- *What is class?*
- *What is Object?*
- *What is Inheritance?*
- *Exceptional Handling?*
- *Simple program for exceptional handling*
- *Static and final difference?*

DBMS Panel:

- *Simple query for select the data from table*
- *Creation of table*
- *Joins inner join, outer join*

Programming Panel:

- *Java program to check the given string is palindromic or not?*
- *Find the last occurrence of the given element and display its index or position*

CENTIZEN DRIVE INTERVIEW EXPERIENCE

Group Discussion

In this Round, 2 different groups were splitted and conduct the group discussion

In my Group, our Topic is *"Social media impacts on politics"*

Noticed in Group discussion

- *See everyone and deliver the content*
- *Loudness of our Content*
- *How new and different kinds of points would be delivered*
- *How we give chance to others in a communication.*

Out of 18 Candidates there were 5 candidate will be selected for third round including me

3rd round

In this round , there is a HR Interview will be conducted with our parents

They informed the salary packages and internship stipend , rules and regulations of the company to me and to my parents and also put 2 years bond for our job role finally They provided the Offer letter and received my certificates of 10 th ,12 th ,and Marksheets of UG upto 4th semester.

VTS ENTERPRISES INDIA PVT LTD.

INTERVIEW EXPERIENCE

It was held on August 05, 2024

Platform: On – Campus

1st round

The first round was an aptitude test

The aptitude test consists of 60 questions with a time limit of 60 minutes

The questions were divided as follows:

- 30 were quantitative aptitude,
- 15 were logical reasoning, and
- 15 were verbal reasoning.

list of the topics covered under quantitative aptitude:

- Profit and Loss
- Ratios
- Boat and Train Problems
- Permutation and Combination
- Least Common Multiple (LCM)
- Perimeter and Area
- Simple Interest and Compound Interest
- Averages
- Time and Work
- Complete the number series

VTS ENTERPRISES INDIA PVT LTD.

INTERVIEW EXPERIENCE

List of topics covered under logical reasoning:

- *Letter-to-Number encoding system*
- *Relationship and Family structure*
- *Determining the day*

List of topics covered under verbal reasoning:

- *Synonyms*
- *Antonyms*
- *Active voice and Passive voice*
- *Direct speech to Indirect speech*
- *Grammatical corrections*
- *Correcting phrases*

At the beginning, I focused more on complex quantitative aptitude questions.

As time went on, I shifted to solving less complex quantitative questions.

In the final 20 minutes, I concentrated more on logical and verbal questions to achieve a decent score.

After finishing the logical and verbal questions, I went back to complete the remaining quantitative questions

The results were available immediately after submission, I received a score of 44.

Out of 208 students, only 49 were selected for the next round

VTS ENTERPRISES INDIA PVT LTD.

INTERVIEW EXPERIENCE

2nd round

The second round was group discussion

There were 5 panels, and I was in the 5th panel, which included 9 students, myself included

The topic assigned to us was ***“Technology Addiction and Its Impact.”***

The group discussion lasted for 10 minutes, with 2 minutes allotted for preparation. When the discussion began, two of my panel members started by highlighting the positives of technology, while I chose to address the negatives

As the discussion continued, the panel head said us to conclude and stated that only two students could provide the closing remarks. I decided to be one of those two and, as a result, I was the last person to provide the conclusion

When the results were announced, it was revealed that only **15 out of the 49 students were selected for Round 3**

3rd round

The third round was a technical HR interview.

Each student went through the technical HR session one by one, and I was the 14th student to be interviewed.

I was a bit anxious after hearing the feedback from students who had already completed their interviews.

I had also prepared answers to the questions that were asked of those who went before me.

VTS ENTERPRISES INDIA PVT LTD.

INTERVIEW EXPERIENCE

Finally, it was my turn for the interview.

I greeted the HR representative, who asked me to introduce myself.

I talked about my schooling, the projects I had worked on, and highlighted one of my favorite projects.

After the introduction, the HR representative asked me which programming language I was most familiar with and I replied that it was Java.

I was asked three questions during the interview.

- *The first question was about the difference between Shallow copy and Deep copy.*
- *The second question concerned the difference between StringBuffer and StringBuilder.*
- *The final question was about the difference between Instance variables and Class variables.*
