

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Electronics and Communication Engineering

Academic Year: 2023-2024 (Even Semester)

Innovative Practices Description for Unit-II

Degree, Semester & Branch: II Semester B.E. ECE B

Course Code & Title: BE 3254 Electrical and Instrumentation Engineering

Name of the Faculty member: Mrs.V.Krishna Meera

Date: 04.04.2024

UNIT II DC MACHINES

Innovative Practice Description

- **Unit / Topic:** IV / Measurements and Instrumentation
- **Course Outcome:** Students able to apply the concepts of measurements and instruments for real time
- **Topic Learning Outcome:** Describe the concept of power systems.
- **Activity Chosen:** Flipped Class Room
- **Justification:** Using this method, students learn at their own pace, engage actively with lecture material, free up class time for more effective, creative, and active activities, and take control and responsibility over their own learning.
- **Time Allotted for the Activity:** 40 minutes

- **Details of the Implementation:**

Students were given a specific topic to learn on their own. The reference book, PPT, and videos were already posted on Canvas. This flipped class is used for the topic, and in addition to the learning materials provided by the faculty, students have the opportunity to browse and locate more knowledge about the energy meter and its operation.

All students understand how energy meter is working and gained knowledge about how power consumption measured. As a result, this topic has been chosen for a flipped classroom activity. Students are divided into groups and assigned task to complete. Bring the class back together to share the work of the separate groups with everyone.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO3
CO4	3	3		2		2		1		1		1	2	2

- PO / PSO mapped:

Innovative practice	PO8	PO10	PSO1	PSO3
	1	1	1	2
Justification for correlation	Identify tenets of the professional code of ethics while doing activity based learning. So, it is mapped at level 2	It helps the students to learn energy meter and deals with preparation of contents which requires written skills. This task is accomplished through Flipped class activity	The students will be able to adapt with new development, so it is mapped with level 2.	The students will be able to design and develop a new system to measure electricity.

- Images / Screenshot of the practice:

- Reflective Critique:

- ❖ *Feedback of practice from students and other stakeholders:*

Students feel that they have improved self-learning. They learn how to communicate with team members and work together.

- ❖ *Benefit of the practice:*

Every students got equal opportunity to come forward to take part in this activity. Through this activity Students learned the topic well.

❖ *Challenges faced in implementation:*

The main challenge faced is that few students not exposed to flipped class room. Students struggle with self-discipline and may turn up to class without having absorbed the lesson. To make all students to participate I started to praise others, taking turns for equal participation, and shared decision making.
