

# RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University  
Accredited by NAAC & An ISO 9001:2015 Certified Institution  
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

## DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

### FACULTY ONLINE COURSE DETAILS

Academic Year 2023-24

| S.No. | Name of the Faculty Members   | Name of the Online Course Registered/Completed                             | University offered by                                     |
|-------|-------------------------------|----------------------------------------------------------------------------|-----------------------------------------------------------|
| 1.    | Dr.C.Arunachalaperumal        | 5G for Everyone                                                            | Coursera- Qualcomm Wireless Academy                       |
| 2.    | Dr.A.Azhagu Jaisudhan Pazhani | Statistics for Data Science                                                | Great Learning                                            |
|       |                               | IoT (Internet of Things) Wireless & Cloud                                  | Coursera - YONSEI University                              |
| 3.    | Dr.S.Vairaprakash             | Differential Equations Part I Series Solutions                             | Korea Advanced Institute of Science and Technology        |
|       |                               | signals and systems                                                        | NPTEL, IIT Mandi                                          |
| 4.    | Dr.A.Lakshmi                  | IUCEE International Engineering Educator Certification Program-Spring 2023 | Indo Universal Collaboration for Engineering Education    |
|       |                               | Matrix Method                                                              | University of Minnesota                                   |
| 5.    | Mr.B.Kannan                   | Digital Circuits                                                           | NPTEL IIT Kharagpur                                       |
| 6.    | Mrs.G.Gnana Priya             | Mathematics for Machine Learning: Linear Algebra                           | Imperial College London                                   |
|       |                               | Introduction to Programming with MATLAB                                    | Vanderbilt University                                     |
|       |                               | 5G and Wireless Communication for Beginners                                | Infosys Spring Board                                      |
|       |                               | Differential Equations Part I Basic Theory                                 | Korea Advanced Institute of Science and Technology(KAIST) |
|       |                               | Wireless 4G-5G enabling technologies                                       | Infosys Spring Board                                      |
|       |                               | 'National Education Policy2020: Professional Development Programme'        | Indira Gandhi National Open University                    |
|       |                               | signals and systems                                                        | NPTEL, IIT Mandi                                          |
| 7.    | Mrs.R.Ramalakshmi             | Differential Equations Part I Series Solutions                             | Korea Advanced Institute of Science and Technology        |
|       |                               | 5G Network Fundamentals                                                    | Institute Mines Telecom                                   |
|       |                               | 5G Principles: Comparing 5G to 4G                                          | Infosys Spring Board                                      |
| 8.    | Mrs.V.SrirengaNachiyar        | Mathematics for Machine Learning: Linear Algebra                           | Imperial College London                                   |
|       |                               | 'National Education Policy2020: Professional Development Programme'        | Indira Gandhi National Open University                    |
|       |                               | Differential Equations Part I                                              | Korea Advanced Institute of                               |

|     |                     |                                                                     |                                                           |
|-----|---------------------|---------------------------------------------------------------------|-----------------------------------------------------------|
|     |                     | Basic Theory                                                        | Science and Technology(KAIST)                             |
| 9.  | Mrs.S.Jeeva         | Mathematics for Machine Learning: Linear Algebra                    | Imperial College, London                                  |
|     |                     | Differential Equations Part I Basic Theory                          | Korea Advanced Institute of Science and Technology(KAIST) |
|     |                     | Introduction to Programming with MATLAB                             | Vanderbilt University                                     |
|     |                     | ‘National Education Policy2020: Professional Development Programme’ | Indira Gandhi National Open University                    |
|     |                     | Signals and Systems                                                 | NPTEL, IIT Mandi                                          |
| 10. | Mr.D.Gopinath       | Differential Equations Part I Series Solutions                      | Korea Advanced Institute of Science and Technology        |
|     |                     | Differential Equations Part II Series Solutions                     | Coursera                                                  |
| 11. | Mr.A.Rameshbabu     | Module 6 - Student Assessment and Evaluation                        | NITTT                                                     |
|     |                     | Module 8 - Institutional Management & Administrative Procedures     |                                                           |
|     |                     | Differential Equations for Engineers                                | The Hong Kong University of Science and Technology        |
|     |                     | Integrated Circuits and Applications                                | NPTEL, IIT Guwahati                                       |
| 12. | Mr.P.Gunasekaran    | Statistics for Data Science                                         | Great Learning                                            |
|     |                     | Differential Equations for Engineers                                | The Hong Kong University of Science and Technology        |
|     |                     | Basics of Linear Algebra using Python                               | Infosys spring board                                      |
|     |                     | Connect and Protect: Networks and Network Security                  | Coursera                                                  |
| 13. | Mr.R.Deiva Nayagam  | Module 6 - Student Assessment and Evaluation                        | NITTT                                                     |
|     |                     | Module 8 - Institutional Management & Administrative Procedures     |                                                           |
| 14. | Mr.G.Sivakumar      | Differential Equations Part I Series Solutions                      | Korea Advanced Institute of Science and Technology        |
|     |                     | Scientific Writing in Health Research                               | NPTEL                                                     |
| 15. | Ms.S.Harini Shriram | CCNA                                                                | Infosys Spring Board                                      |
|     |                     | CCNA Exam Prep 640-802 Training                                     |                                                           |
|     |                     | Differential Equations Part I Basic Theory                          | Korea Advanced Institute of Science and Technology(KAIST) |
| 16. | Dr.R.Rajalakshmi    | Differential Equations Part I Series Solutions                      | Korea Advanced Institute of Science and Technology        |
|     |                     | Differential Equations Part II Series Solutions                     | Korea Advanced Institute of Science and Technology        |

|     |                              |                                                                         |                                                                 |
|-----|------------------------------|-------------------------------------------------------------------------|-----------------------------------------------------------------|
| 17. | Mrs.G.Subhashini             | Differential Equations Part I<br>Series Solutions                       | Korea Advanced Institute of<br>Science and Technology           |
|     |                              | Differential Equations Part II<br>Series Solutions                      |                                                                 |
|     |                              | Wireless 4G-5G enabling<br>technologies                                 | Infosys Spring Board                                            |
| 18. | Ms.L.Krishna Kumari          | Differential Equations Part I<br>Series Solutions                       | Korea Advanced Institute of<br>Science and Technology           |
