Report for Industrial visit

Industry: Gowri House Metal Works, Rajapalayam

Date: 05.10.2020

Time: 03. 00 PM to 05.15 PM

Objective of the visit:

1. To provide industrial Internship for students
2. To carryout students' academic projects

Mr. D. Karthik Prabhu, AP(SG) and Mr. Rengasubramanian, Sr.Enginner, Power House/RIT visited the Gowri House Metal Works regarding students projects and Internship.

Mr. Jai Saravanan, Sales Manager, guided us. He explained all the process involved in the production of different types of screws.

The process involved in the screw manufacturing is 80% mechanical oriented. So, Mechanical department students will get most benefited. Recently they import fully automated machines from Taiwan which has some sensors and PLC programming.

They face some problem with that PLC programming. Students with PLC programming knowledge may rectify the problems they faced. Because there is, no one knows PLC programming.

More over from their end they request us to improve the process performance by convert the manual operating machine to automatic operating machine through the students' projects. They will also ready to guide our students.

Outcomes of the visit:

1. In Internship point of view, there is a lot of scope for Mechanical students.
2. In student project point of view there is an opportunity for interdisciplinary project.
(Mechanical and EEE)
 - (a) Automate the process
 - (b) Segregate the different types of screws.
