

RAMCO INSTITUTE OF TECHNOLOGY
RAJAPALAYAM -626 117

(Approved AICTE New Delhi, Affiliated to Anna University, Chennai – 600 025)

An ISO 9001: 2015 Certified and NAAC Accredited Institution

**Energy Conservation Quality Circle (ECQC) in Association with RIT- EEE Alumni
Association and RIT- IEEE Student Branch**

Jointly Organizes

Industry Lecture on “Energy Conservation Activities in Industry Premises”

Date: 04.10.2020

Time: 10.00 AM to 11.30 AM

Topic: Energy Conservation Activities in Industry Premises

Keynote Speaker: Mr. V. Roshan, Assistant Manager – E&I,

The Ramco Cements Limited, Andhra Pradesh

Other Dignitary: Mr. Durairaj HoD – E&I,

The Ramco Cements Limited, Andhra Pradesh

Coordinator(s):

Mr. E. Thangam, Faculty Co-ordinator, Energy Conservation Quality Circle

Mr. D. Karthik Prabhu, AP(SG) - EEE

Dr. K. Karthikeyan, RIT – EEE Alumni Incharge

Mr. A. Arunkumar, RIT – IEEE Faculty Adviser

Participants Count: 71

Resource Person Profile:

Mr. V. Roshan - Ramco Institute of Technology – EEE - Alumni 2014- 2018

Currently he is working as Assistant Manager – E&I, The Ramco Cements Limited, Jeyanthipuram, Andhrapradesh

Technical Content:

He nicely delivered the lecture on “Energy Conservation Activities in Industry Premises”. He explained various energy conservation practices in industry. He mentioned various case studies regarding energy wastage. He listed some energy efficient equipment being used in various industries to conserve energy. He clarified many doubts of the participants. Finally he concluded with some motivation talk to the present final year students.

Roshan Gururam is presenting

Length of th stator core(L)	0.222	I/T ratio
Armature Diamater (D)	0.162	Minimum Cost 1.5 to 2
Numbre of poles	4	For good power factor 1 to 1.25
Pole pitch (Tau)	0.14287	For good efficiency 1.5
I/Tou ratio	1.5538602

Power Factor Compensation

Large Power factor means we are not fully utilizing the power we are paying for

$KVA = KW * PF$

Before compensation: 100 kW, 142 kVA, 100 kVAR, $PF = \frac{100}{142} = 70\%$

After compensation: 100 kW, 105 kVA, 33 kVAR, $PF = \frac{100}{105} = 95\%$

Power capacitor acts as a reactive current generators, By providing the capacitor near motor the total amount of current drawn from the system will decrease thereby reduction in cable losses, Hence efficiency of the power system will increase

RAMCO WHR SCENARIO

39.15 MW

Ramco Cements to cut emissions with waste heat recovery system

RAMCO Cements Jayanthipuram Unit has commissioned 9MW WHR Plant and another two units of 9MW WHR plant yet to be commissioned

RAMCO Cements Kolimangundla unit is also in the process of commissioning of WHR plant with the capacity of 12.15MW

With these developments the company's aggregate capacity of WHR would be 39.15MW
