Training Report

Name of the Training: Solar Roof Top Vendor Training Program for Vendors in the State of Tamil Nadu for successful and smooth implementation of “PM Surya Ghar: Muft Bijli Yojana”

Date: 08.08.2025 to 30.08.2025

Organizer(s): Tamilnadu Green Energy Corporation Limited, Tamilnadu
Tamilnadu Power Distribution Corporation Limited
(TNPDC), Tamilnadu

Training Partner: Vasudha Foundation, Bangalore

Knowledge Partner: Energy Conservation Quality Circle, Ramco Institute of Technology, Rajapalayam

Trainers for Vendor Program

1. Dr. P. Prem, ASP – EEE
2. Dr. E. Thangam, AP-III / EEE
3. Mr. S. Meenakshisundaravel, AP(SG) – EEE
4. Dr. S. Jeyanthi, AP-III / EEE

Training Schedule:

Sl.No	Name of District	Date of Training	Resource Person
1.	Madurai	08.08.2025	Dr. S. Jeyanthi & Dr. E. Thangam
	Theni		
	Sivagangai		
	Dindigul		
	Ramanathapuram		
2.	Tirunelveli	11.08.2025	Dr. P. Prem & Dr. S. Jeyanthi
	Tenkasi		
	Virudhunagar		
	Tuticorin		
	Kanyakumari		

3.	Erode	12.08.2025	Dr. E. Thangam & Dr. S. Jeyanthi
	Salem		
	Namakkal		
	Karur		
4.	Vellore	13.08.2025	Dr. E. Thangam & Mr. S. Meenakshi Sundaravel
	Tirupattur		
	Ranipet		
	Krishnagiri		
5.	Thiruvarur	19.08.2025	Dr. P. Prem & Mr. S. Meenakshi Sundaravel
	Thanjavur		
	Nagaipattinam		
	Mayiladuthurai		
6.	Villupuram	22.08.2025	Dr. P. Prem & Mr. S. Meenakshi Sundaravel
	Cuddalore		
	Thiruvannamalai		
	Dharmapuri		
	Kallakurichi		
7.	Thiruchirapalli	25.08.2025	Mr. S. Meenakshi Sundaravel & Dr. S. Jeyanthi
	Ariyalur		
	Perambalur		
	Pudukkottai		
8.	Chennai	26.08.2025	Dr. P. Prem & Dr. E. Thangam
	Thiruvallur		
	Kancheepuram		
	Chengalpattu		
9.	Coimbatore	30.08.2025	Dr. E. Thangam & Mr. S. Meenakshi Sundaravel
	Tiruppur		
	Nilgiris		

No. of Sessions per faculty:

Name of the Faculty Member	No. of sessions
Dr. E. Thangam	5
Mr. S. Meenakshi Sundaravel	5
Dr. S. Jeyanthi	4
Dr. P. Prem	4

Report:

The trainers explained the technical content in the vendor training. The details are given below:

Recommended Soft wares

PVsyst

- Used for in-depth simulation and performance prediction of PV systems.
- Helps vendors design optimal rooftop layouts, considering shading, orientation, and losses.
- Generates technical reports including energy yield, system losses, and financial analysis.

Google Earth Pro

- Used to assess rooftop availability, shading, and nearby obstructions using satellite imagery.
- Vendors use it for preliminary site feasibility without needing a physical visit.
- Helps estimate roof size and azimuth for planning panel placement and orientation.

PVWatts (by NREL)

- A free web-based tool that estimates solar energy production based on location and system size.
- Vendors use it to quickly assess expected energy output and economic returns.
- Useful for generating basic energy simulations during client consultations.

Google SketchUp

- A 3D modeling tool used to visualize rooftop solar panel layouts on buildings.
- Vendors use it to create realistic designs showing panel placement, tilt, and shadows.
- Helps in client presentations and for verifying physical fit before installation.

Also the trainer explained the technical content as given below.

Introduction to Rooftop Solar PV Systems, Basics of solar energy and photovoltaic effect, Types of PV systems: Off-grid, On-grid, Hybrid, Components: PV modules, inverters, mounting structures, net meters

Site Assessment and Feasibility

Use of tools: PVsyst, Google Earth Pro, PVWatts, Google SketchUp, Roof orientation, tilt angle, shadow analysis, Load assessment and sizing the PV system based on consumption

System Design and Simulation

Designing string configuration and inverter sizing, Calculating energy yield and system losses, Preparing bill of materials (BOM), Software demo: Simulation with PVsyst and SketchUp models

Standards and Compliance

MNRE / BIS standards for solar equipment, ALMM and DCR compliance, Safety codes: IS/IEC standards, electrical safety, fire safety, DISCOM/TANGEDCO approvals and documentation

Installation Procedures

Pre-installation checklist (roof condition, electrical inspection), Mechanical installation of modules and mounting structure, Electrical wiring, earthing, and inverter connection, AC/DC cable routing, MCBs, SPD, junction boxes

Net Metering and Grid Synchronization

Understanding net metering policies in Tamil Nadu, Coordination with TANGEDCO for net meter approval, Synchronizing inverter with the grid and commissioning.

Testing, Commissioning, and Troubleshooting

Testing tools: multimeter, insulation tester, IV curve tracer, Functional tests: voltage, current, inverter sync, safety cut-off, Troubleshooting common issues: underperformance, grid faults, inverter errors

O&M and After-Sales Service

Routine inspection schedule and cleaning best practices, Remote monitoring using inverters and data loggers, Customer support, warranty handling, AMC contracts

Financial and Documentation Support

Cost estimation and subsidy calculation, Loan and EMI options for clients, Uploading documents on national portal for subsidy claims

Soft Skills and Client Engagement

Effective client communication and site presentation, preparing system handover documents and user manuals, Building trust for long-term service and referrals

The trainer explained the PM Surya Ghar Policy with respect to the state of Tamil Nadu. The details are given below:

Launch & Objective

- Launched on February 15, 2024, aiming to install rooftop solar systems on 1 crore homes nationwide

Subsidy Structure

- Rs. 30,000 per kW for 1 kW systems, Rs. 60,000 for 2 kW, and Rs. 78,000 maximum (3 kW+)

Eligibility

- Must be an Indian citizen, homeowner with a suitable rooftop, valid utility connection, and must not have availed any previous solar subsidy

Implementation Partners

- National-level by NPIA; state deliveries via DISCOMs/TANGEDCO in Tamil Nadu

Financial & Deployment Benefits

- Collateral-free loans up to ₹ 2 lakh at ~6.75% interest available from public sector banks
- Direct subsidy payment to bank accounts within ~15–30 days post-commissioning

Environmental Impact

- As of 10 March 2025: 10 lakh+ homes powered, 3 GW capacity installed, with ₹ 4,770 crore disbursed

Total Subsidy Examples:

1 kW	₹ 30,000
2 kW	₹ 60,000
3 kW +	₹ 78,000

Typical Costs After Subsidy (TN):

1 kW	₹ 40,000–80,000
2 kW	₹ 60,000–1,00,000
3 kW	₹ 92,000–1,32,000

Eligibility Requirements:

- Domestic electricity connection through TANGEDCO
- Use of DCR/ALMM-approved solar components
- Property and meter ownership align with applicant's name
- No previous central solar subsidy availed

Documents Needed:

- Aadhaar, proof of address, bank details (including canceled cheque)
- Structural certificate, site layout plan, latest electricity bill, NOC from TANGEDCO

Application Process

- Register via the national portal → select state DISCOM (e.g., TNPdCL / TANGEDCO)
- TNEB Limited
- Portal login with OTP and details.
- Feasibility approval from TANGEDCO → choose an MNRE/TEDA-approved vendor.
- Installation & commissioning → net meter setup and inspection.
- Upload documents (bank account, cancelled cheque, commissioning certificate).
- Subsidy credited within ~30 days post-commissioning

Progress in Tamil Nadu

- Target set: 2.5 million rooftop systems (Apr 2024 – Mar 2025).
- As of latest update: ~70,000 registrations, 18,000 applications submitted, and 13,000 installations completed.

- Indicates a gap in uptake, suggesting need for increased awareness and facilitation.

Summary

- Up-front subsidy: ₹ 30–78 k (central) + ₹ 20 k (state)
- Loan facility: ₹ 2 lakh at 7% interest
- Process: All online → national portal + DISCOM/vendor pathway
- Timeline: Subsidy within 15–30 days; system life expectancy 25+ years
- Current challenges: Low registration rate vs target—awareness needed
