

Department of Information Technology
Academic Year 2023– 2024(Odd Semester)

Degree, Semester & Branch: III Semester B.Tech. IT

Course Code & Title: CS3362 & Foundations of Datascience

Name of the Faculty member (s): Dr.V. Anusuya, ASCP/IT

Innovative Practice Description

- **Unit / Topic:** Unit 3 / Multiple regression equations
- **Course Outcome:** The student will be able to know the idea of the Multiple regression equations in data science.
- **Topic Learning Outcome:** TLO7.
- **Activity Chosen:** Flipped Class Room
- **Justification:**
 - To determine the students' level of comprehension regarding the multiple regression equation, a video describing the concept of multiple regression equations was posted to the student group. The question was asked in the majority of university questions, and it is one that is important.
- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**
 - The material for the activity were given to the students one week before through the mail and canvas. The students were asked to watch the video individually at their home and take the notes according to their understanding level.
 - On the day of activity ask the students to form a group. Each student discussed the topic multiple regression equations with example with their group.
 - Invite everyone back together in class to discuss each group's work. Ask questions and explore their understanding individually.
 - Mr.K.Dinesh and Mr.Suhail Ahamed,Mr.Sri Sarukumar and Mr.Dheenathayalan teams explained the concept of Multiple Regression equation in Figure 1 and 2.
- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO12	PSO1	PSO2	PSO3
CO3	3	3	2	2	2	2	3	2

(1 – Low

2 – Moderate

3 – High)

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

Accredited by NAAC & An ISO 9001:2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO4	PO12	PSO1	PSO2	PSO3
	3	3	2	2	2	2	3	2
Justification for correlation	Apply basic Knowledge and fundamentals of correlation and regression techniques for solving practical problems	Identify the need of correlation and regression techniques for developing applications	Able to design solutions for applications implementing correlation and regression techniques and find relation between data	Able to analyze the relationship between data and provide valid conclusions on data	Ability to recognize the need for correlation and regression techniques in real world applications	Exhibit knowledge in correlation and regression techniques to provide solution for complex computational problems	Exhibit knowledge in correlation and regression techniques in the field of IoT, Cloud Computing and Data Analytics to provide IT solutions.	Exhibit knowledge in correlation and regression techniques in software projects to deliver a quality product

- **Images / Screenshot of the practice:**

Figure 1: Discussion on the topic multiple regression equations Dinesh Team

Figure 2. Discussion on the topic multiple regression equations by Sri Saru kumar Team

- **Reflective Critique:**

- **Feedback of practice from students and other stakeholders:**
 - The students are actively participated in the activity.
 - The student can able to explore their knowledge on explaining the topic Multiple Regression Equation and its applications.
 - This activity helps the students to gain knowledge on the regression analysis and they gain the knowledge of solving multiple regression equation.
- **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- The students understand well about Multiple regression equation for prediction of data
- It worked well for the students to interact with the teacher and other students during the lesson.
- Students' fear decreased when they talked to their peers about it.
- It helps students in developing their ability for self-learning.
- Every student will have a thorough understanding of the use of multiple regression in data analysis.

❖ ***Challenges faced in implementation:***

- Some students are hesitated to come to dias.
- The activity was planned for 20 Minutes, but it takes 25 minutes because the students hesitate to come dias.
