

Department of Information Technology

Academic Year 2024 - 2025 (Even Semester)

Degree, Semester & Branch: VI Semester B.Tech. IT

Course Code & Title: CCS335& Cloud Computing

Name of the Faculty member (s): Mrs. A. Alagulakshmi

Innovative Practice Description

- **Unit / Topic:** Unit I / NIST Cloud Computing
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO2
- **Activity Chosen:** Mind map
- **Justification:**

NIST Cloud Computing is a significant topic covered in unit I and frequently brought up in university questions. A mind map illustrates the connections between the many parts of the total in a hierarchical manner. It is frequently made around a single idea, depicted as an image in the middle of a blank page, to which related images, words, or word fragments are appended. As a result, the students can organize knowledge and comprehend the material with ease.

- **Time Allotted for the Activity:** 15 Minutes
- **Details of the Implementation:**
 - I explained the NIST Cloud Computing concept.
 - The time allotted for the topic is 15 Minutes.
 - The students were asked to study the concepts of NIST Cloud Computing and activities.
 - Next day asked the students to recall the concept and ask them to draw a mind map.
 - The students completed the activity, the sample of activity as shown in Figure 1.

• CO – PO / PSO mapping:

CO	PO1	PO2	PO5	PO9	PO10	PO11	PO12	PSO3
CO1	3	3	2	3	3	2	2	3

(1 – Low 2 – Moderate 3 – High)

• PO / PSO mapped:

Innovative practice	PO1	PO2	PO5	PO9	PO10	PO11	PO12	PSO3
	3	3	2	3	3	2	2	3
Justification for correlation	The students could learn the basics of cloud computing at NIST.	The students could be able to recognize a structured framework that defines the basic building blocks of cloud computing.	The students could be created by various NIST cloud computing activities.	The students design and explained difficulties with cloud technology.	The students could be able to use various frameworks for cloud computing.	Students can be able to analyze different forms of design challenges of NIST cloud Computing.	Students can be able to recognize the need and be able to clearly explain the design challenges of cloud technologies	Students will be able to enrich the critical thinking skills in design challenges of NIST cloud Computing technologies

• Images / Screenshot of the practice:

Figure 1: Mindmap NIST Cloud Computing of Swathi S

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students said they were able to remember and maintain the concepts of NIST Cloud Computing.
- According to the students, the exercise improved their capacity for independent learning and helped them recall all of the material from the prior class.
- It instructs students on NIST Cloud Computing.

- ❖ ***Benefit of the practice:***

- It helps students remember NIST Cloud Computing and improves their problem-solving skills.
- Students are able to add their own opinions on the mind map.

- ❖ ***Challenges faced in implementation:***

- Some students had trouble creating mental maps, and some of the questions made it difficult to determine which elimination to apply first.
- I felt that information on slow learners was unclear. After I explained things clearly to each pupil, they all understood completely.
