

Department of Information Technology

Academic Year: 2024 - 2025(Even Semester)

Degree, Semester & Branch: B. Tech, VI & IT

Course Code & Title: CCS335 & Cloud Computing

Name of the Faculty member: A. Alagulakshmi, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit V / Hyper jacking
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO32
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - The One-Minute Paper activity provides students with a brief, focused opportunity to summarize and reflect on what they learned in a class session, helping reinforce key concepts.
 - Hyper jacking is a crucial topic that introduces students to security vulnerabilities in cloud computing environments.
 - This activity was chosen as a quick and effective recap tool to reinforce foundational knowledge and assess students' understanding.
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
 - The faculty introduced the topic by explaining cloud computing techniques, types, and the significance of **Hyperjacking** as a critical security threat.
 - After the explanation, students were asked to summarize the topic within 60 seconds on paper.
 - Sample responses by **Mr. Prasath G** and **Ms. Abinaya S** are shown in **Figure 1**.
 - The faculty reviewed the responses. Students who wrote incorrect or unclear summaries were guided and asked to rewrite them for better understanding.
- **CO – PO / PSO mapping (specific to this activity):**

CO	PO1	PO2	PO5	PO10	PO11	PSO1
CO5	3	3	2	2	2	3

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO5	PO10	PO11	PSO1
	3	3	2	2	2	3
Justification for correlation	Students can evaluate and compare multiple approaches to address cloud security issues.	They apply computer science and engineering concepts to solve real-world cloud security problems.	Students recognize tools and techniques used for protecting virtual environments.	Learners interpret and reflect on technical content related to cloud threats like hyperjacking.	Students identify tasks and solutions necessary for resolving cloud security challenges.	Critical thinking is enhanced through quick reflection and application of knowledge using real-time security issues.

Fig 1: Sample One minute paper activity Written by

Mr. Prasath G and Ms. Abinaya S

Reflective Critique:

❖ *Feedback of practice from students and other stakeholders:*

- Students mentioned that the activity helped them recall techniques and concepts related to **Hyper jacking** effectively.
- They noted that this method would be helpful during exam preparation and for reinforcing machine learning and cloud security concepts.

❖ *Benefit of the practice:*

- Improved student retention of the topic.
- Gave faculty insight into students' understanding and identified learning gaps.

❖ *Challenges faced in implementation:*

- A few students initially misunderstood the concept and required correction.
- Some students took more time than expected to complete the one-minute summary.
