

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering.

Academic Year: 2024 - 2025(Odd/Even Semester)

Degree, Semester & Branch: B. Tech, V & IT

Course Code & Title: CS3551& Distributed Computing

Innovative Practice Description

- **Unit / Topic: Unit V/ Cloud Services**
- **Course Outcome: CO 5**
- **Activity Chosen: warm up class**
- **Justification:**

This topic is important for university examination. Course instructor had chosen this topic to be conducted as a warm-up classroom activity for the easy understanding purpose. It will help the students to recollect concepts and capture more points from their peer students

- **Time Allotted for the Activity: 10 Minutes**

- **Details of the Implementation:**

- Course instructor asked the student to represent at least two key words which he/she studied earlier class on the board.
- Once he/she say a key word in front of all, then he/ she explained more information about that keyword.

Activity:

- Faculty member randomly chosen the students from the class and he asked the particular students to come in front.
- Course instructor asked them to say one key word whichever he/she is having in his/her mind based on the previous class which is shown fig.1.
- He/she came in front of the class and narrated one or two points about the keyword. the key word that covered in the last class by the course instructor.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO5	PO10	PSO1	PSO2	PSO3
CO5	3	1	2	2	3	3	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO5	PO10	PSO1	PSO2	PSO3
Justification for correlation	3	2	2	2	3	3	2
	Students will be able to explore the concept of cloud Computing .	Students will be able to identify, formulate and analyze the best solution using the basic knowledge of the cloud service model concepts	Students will be able to use the modern tools to explore the knowledge in cloud computing .	Students will be able to produce well and good documentation for cloud computing and its services models.	The basic understanding of the designing will enable the students to develop software to solve the complex computation tasks.	Students could apply the knowledge of features supported by various UI design in developing reliable IT solutions.	Students can be able to apply appreciable knowledge of design and development practices to deliver a quality outcome in software project.

• **Images / Screenshot of the practice:**

Fig 1: A Student in front of class say a keyword

Reflective Critique:**❖ Feedback of practice from students and other stakeholders:**

- The warm up activity was very interesting and able to identify the appropriate name of the event handler.
- It will be helpful while preparing for examination

❖ Benefit of the practice:

- Most of the students were actively participated in the activity
- Students in the class were able to identify and correct the mistakes when they presented the information about the keyword.
- Students understood the various technologies used in cloud computing and services providers.
