

Department of Information Technology
Academic Year 2025 – 2026 (Even Semester)

Year, Degree, & Branch : VI-Semester-, B.Tech-IT
Course Code & Title : CCS374- & Web Application Security
Name of the Faculty member : B.Thevahi, AP/IT
Innovative Practice Description

- **Unit / Topic** : IV/ Vulnerability Assessment Life Cycle
- **Course Outcome** : CO4
- **Topic Learning Outcome**: TLO6
- **Activity Chosen** : One-Minute-Paper
- **Justification:**

A One-Minute Paper is a short classroom activity in which students write brief answers to one or two questions based on the lesson they have just learned. I selected this activity for the Vulnerability Assessment Life Cycle because the topic involves multiple sequential stages. This activity helps students quickly recall, organize, and reinforce these steps, thereby improving their understanding and engagement with the vulnerability assessment process.

- **Time Allotted for the Activity:** 10 Minutes

❖ **Details of the Implementation:**

- The Instructor took a class on Vulnerability Assessment Life Cycle.
- After completing the lecture, students were asked to take one minute to write a short response to a question related to the topic.
- Students wrote their answers individually on paper within one minute. This activity encouraged students to quickly recall the stages such as vulnerability identification, analysis, risk prioritization, remediation, and reporting.
- Some of the papers K.Kaviya and A.Ashika paper is shown in Fig1(Kaviya and Fig 2 Ashika)

• **CO – PO / PSO mapping:**

CO	PO1	PO3	PO4	PO5	PO8	PO12	PSO3
CO4	3	2	2	3	3	3	2

(1 – Low 2 – Moderate 3 – High)

Innovative practice	PO1	PO3	PO4	PO5	PO8	PO12	PSO3
CO4	3	2	2	3	3	3	2
Justification for correlation	The students will be able to understand the basic knowledge and fundamentals of vulnerability assessment	The students will be able to identify the need for analyzing security vulnerabilities in complex web applications and network environments.	The students explore the different stages of the Vulnerability Assessment Life.	Students gain knowledge of vulnerability scanning techniques and security assessment tools used in cybersecurity practices.	The activity improves students' ability to communicate technical concepts related to vulnerability assessment and system security.	Students develop domain knowledge in performing vulnerability assessment to strengthen system and application security.	Students understand how vulnerability assessment contributes to building secure and reliable software systems.

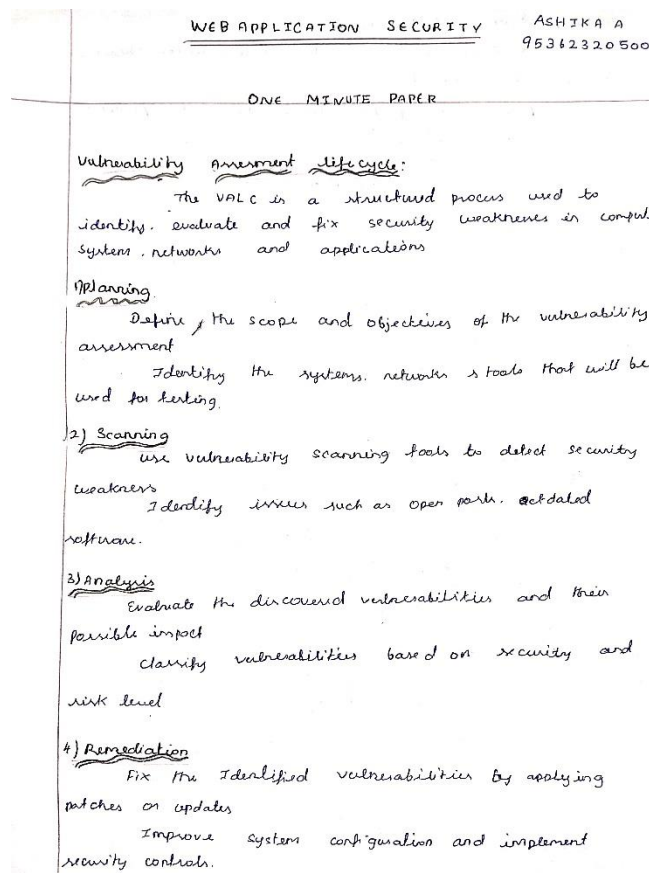

Figure2: One Minute-Paper-A.Ashika

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- All students what they understood from the class handled by the instructor.
- During this session, some students felt it was difficult to write within the limited time.
- Many students mentioned that although they understood the concept, recalling and writing the points within one minute was challenging.

- ❖ **Benefit of the practice:**

- The One-Minute Paper activity helps students quickly recall and understand the key stages of the Vulnerability Assessment Life Cycle through short written responses.
- It improves student's analytical thinking and ability to identify security vulnerabilities in web applications and systems.
- The practice encourages active participation and quick reflection, helping students reinforce cybersecurity concepts.

- ❖ **Challenges faced in implementation:**

- Some students initially found it difficult to understand technical terms related to vulnerability assessment, such as vulnerability identification, risk prioritization, and remediation.
- A few students felt it was challenging to recall the stages of the Vulnerability Assessment Life Cycle within the limited one-minute time.
