

**Department of Information Technology****Academic Year 2025 – 2026 (Even Semester)****Year, Degree, & Branch : VI-Semester, B.Tech-IT****Course Code & Title : CCS374- & Web Application Security****Name of the Faculty member : B.Thevahi, AP/IT****Innovative Practice Description**

- **Unit / Topic : II/ Security Incident Response Planning**

- **Course Outcome : CO2**

- **Activity Chosen : Learning by Teaching**

- **Justification:**

This practice encourages active participation and deeper understanding among students. When students explain concepts to their peers, they learn the subject more clearly and confidently. This method helps students to improve communication skills, critical thinking, and self-confidence. It also promotes peer learning and collaborative learning, making the classroom more interactive and student-centered.

Time Allotted for the Activity: 15 Minutes❖ **Details of the Implementation:**

- The instructor gave topics to the students in the previous class. The mentioned students were prepared for this class.
- Saranya P. taught about the objectives and phases of Incident Response Planning as shown in figure2.
- S. Pavithra continuously took classes on the importance of incident recovery planning and recovery systems as shown in figure1.
- In that class, they used a PPT with diagrams.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO12	PSO2	PSO3
CO2	1	2	1	2	3	2	1	1

(1 – Low**2 – Moderate****3 – High)****PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO5	PO12	PSO2	PSO3
Justification for correlation	Students understand basic ideas of network security, encryption, and authentication.	Students learn to identify security problems in data transfer.	Students understand how SSL is designed, including certificates, keys.	Students learn how SSL works in real situations to protect data	Students use diagrams, mind maps, and digital tools to explain SSL concepts clearly..	Students are motivated to learn new security technologies and keep themselves updated	Students gain knowledge of security in web, IoT,	Students understand the importance of SSL.

• **Images / Screenshot of the practice:**

Figure2:Presented by Saranya.P

❖ **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students felt that teaching others helped them understand the topic better.
- They enjoyed learning from their classmates in a friendly way.
- Faculty members observed better student participation in the class.
- The practice made learning more active and interesting.
- The activity promoted self-reflection and critical thinking
- The practice created a positive and collaborative learning atmosphere.

❖ **Benefit of the practice:**

- Learning by Teaching helps students understand the topic more deeply because they need to explain it to others.
- The practice improves students' confidence, communication, and presentation skills.
- It encourages active participation and creates an interactive classroom environment.
- It makes the classroom more interactive and engaging.

❖ **Challenges faced in implementation:**

- Some students were initially hesitant to teach in front of their classmates.
- Later, their presentation progressed confidently.
- They felt to Facing Doubt clarification is difficult to handle, but tried to clarify the doubts.
