

Department of Information Technology

Academic Year 2023 – 2024 (Odd Semester)

Degree, Semester & Branch : III Semester-B. Tech Information Technology
Course Code & Title : CS3391 Object Oriented Programming
Name of the Faculty member (s) : S. Sakkaravarthi, AP/IT

Innovative Practice Description

- **Unit / Topic** : Unit 4 / Basic String class & Methods
- **Course Outcome** : CO4
- **Topic Learning Outcome:** TLO14
- **Activity Chosen** : Think Pair Share
- **Justification:**
 - Think Pair Share activity is chosen to make the students to think the way of writing programs using String class and its methods. The understanding of String class, constructors and methods is essential for implementing string manipulation programs.
 - Student think individually about how to use methods available in String class in real time examples like checking Password strength, form validation etc. This activity makes the student to get in-depth knowledge about String handling methods in java.
- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**
 - Instructor explained the members of String class like constructors, methods, and also demonstrate the various String class methods with examples. After explaining the String concept, the think pair share activity was carried out in the class room for a total of 20 minutes.
 - The students were provided with questions on various string handling methods. Then the instructor asked the students to **think** individually and write the answer in a paper within 5 minutes as shown in Figure 1
 - Next, the Students were allowed to **pair** up or make a group with neighbour in the class and discuss their points with them in 5 minutes and justify the relevant answer with each other as shown in Figure 2.
 - Few students were called in front of the class and asked to share the correct answer as shown in Figure 3

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO4	3	2	2	2	2	3

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	The concept of String handling methods in java is introduced to the students who can use it in form validation	Students will be able to apply various methods of String class in real time applications	Students will be able to provide solutions for the problem statements using the String handling concept.	As the student involved in the activity as team, the team work skill improved	Students communication skill will be improved as they are facing audience	The Students will be to apply the built-in methods of string class in developing software applications

- **Images / Screenshot of the practice:**

Fig 1: Students thinking about the given problem

Fig 2: Pair with neighbour and discuss answer

Fig 3: P. Siva Sekar & A. Thirumurugan share the answer to entire class

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students said that the activity is very useful to apply the concept that they learnt to solve the given problem easily
 - Students said that it will be very helpful when preparing for examinations.
 - They felt comfortable to share their understanding about the concept with class mates

- ❖ ***Benefit of the practice:***

- Think Pair Share activity gives opportunity among students to share their understanding about the concept with neighbours and also improves their speaking and listening skills.
 - This activity is very interactive and made the slow learners to clarify the doubts with their peers.
 - It helps in improving students oral communication of by delivering the concepts that they learnt in class.

- ❖ ***Challenges faced in implementation:***

- Few student pairs were randomly selected to perform their presentations in front of the class due to time constraints.
 - Make the student to know the impact and significance of sharing their understanding about the topic.
 - The activity needs more time to share their views

From the observations, the students were still lagging to understand the concept, so to overcome this, I discussed all the doubts with the students and make them understand the topic.
