

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch: II Semester B.Tech. IT

Course Code & Title: CS3251& Programming in C

Name of the Faculty member (s): Mrs.G.Mareeswari

Innovative Practice Description

Unit / Topic: Unit III / Pointers and its operations

Course Outcome: CO 3

Topic Learning Outcome: TLO 6

Activity Chosen: Think Pair Share

Justification:

- Think pair share activity involves the students to think individually and to share the knowledge.
- In C language, pointer is an important concept and it is necessary for students to understand the pointer concept and its operations. Because they allow us to manipulate the data in the computer's memory. This can reduce the code and improve the performance. The students' individual understanding capability can be tested and the gained ideas can be shared by think-pair-share activity.

Time Allotted for the Activity: 15 minutes

Details of the Implementation:

- Instructor explained the particular concepts/topic in classroom within 30 minutes. Instructor gave a program to the students.
- Students think about what they know or have learned in the pointer concept, and come up with their own idea. [Takes 1-5 Minutes].
- The instructor asks them to pair with nearby students to discuss the program solution. The students interact with each other about their programs to deepen understanding of the iterative.
- They share their thoughts with each other and proceed with the task. [Takes 6- 10 Minutes].
- Students share their solution with the entire class [Takes 11-15 Minutes].
Instructor moderates the discussion and highlights important points.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO 3	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
	2	1	1	1	1	1
Justification for correlation	It includes logical thinking and make the student able to think about problem solving approach	Able to approach the program by applying what they learnt.	Able to provide solution for the memory allocation or access related programs.	Students involved in the activity as team, the team work Skill Improved.	Students' communication skill will be improved as they are facing audience and communicating the activity	Students were able to apply C programs to provide solution for the complex computational problems.

• Images / Screenshot of the practice:

Glimpse of Think Pair Share Activity

(Figure1.a is the answer shared by the team members Divya.sri, J. S, Gayathri.K, Janani.P and Figure1.b is the answer shared by the team Jeevasri.M, Sibiah, R, and Jeyalakshmi for the given question.)

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that this activity helps them to remember the concepts and it will be very helpful to correct their mistakes while sharing the program solution to the other students.
- The students felt that this activity is so interesting and helps them to remember
- They said it will be very helpful when preparing for exams

❖ **Benefit of the practice:**

- From this activity, the students can get more clarity in the particular topic.
- Students can able to explain the concepts without any confusion.
- This practice has made the class more interactive than the conventional practice

❖ **Challenges faced in implementation:**

- All the students were unable to complete the task within allotted time
- Few students found it difficult to solve the program individually. After discussion, they felt easy
