

Department of Information Technology
Academic Year 2023 - 2024 (Even Semester)

Degree, Semester & Branch: II Semester B.Tech. IT

Course Code & Title: CS3251 & Programming in C

Name of the Faculty member (s): Mrs. G.Mareeswari, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit IV / Structures
- **Course Outcome:** CO4
- **Topic Learning Outcome:** TLO9
- **Activity Chosen:** One Minute Paper

- **Justification:**

In C programming, Structure is an important topic comes under the category of User Defined Data types. The drawback of array is it is a homogenous collection of similar types. To overcome this drawback structure concept is developed; structure can have elements of different type stored adjacently and identified by a name.

- **Time Allotted for the Activity:** 10 Minutes

- **Details of the Implementation:**

At the end of the lecture, students were instructed to write about the structure concept that had been discussed. During the first 35 minutes, the instructor explained the specific structure related concepts/topic in the classroom. The students stated their understanding of the structure topic as well as the information for which they require additional explanation. Figure 1.a shows the points about structure that students shared during this activity. This task assesses students' understanding of the idea of structure as well as the syntax for declaring and initializing structure variables. They also expressed how to access the members of the structure in this activity. This activity demonstrated the involvement of students in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PSO1	PSO2	PSO3
CO4	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

• PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PSO1	PSO2	PSO3
	2	1	1	1	1	1
Justification for correlation	Needs basic engineering knowledge for understand the structure concept	Structure concept can also be used to analyze the complex engineering problems.	The students can able to find solution for the complex problems using the concept of structure	Structures are used in many data science algorithm to solve complex computational problem	The students can apply the concept of structure in research finding and provide reliable solution	The students can use this concept of structure in software project development.

• Images / Screenshot of the practice:

Reflective Critique:

❖ *Feedback of practice from students and other stakeholders:*

- The students felt that they can able to understand the events topic clearly after conducting this activity.
- They felt this activity makes them to concentrate and memorize the concept earlier;

❖ *Benefit of the practice:*

- Students were actively participated in this activity.

- From this activity, the students can get more clarity in the structure topic.
- Students can able to explain the topic without any confusion.
- Make the students to know the impact and importance of sharing their views and understanding related to the topic and made them involve in the activity.

❖ ***Challenges faced in implementation:***

- Some students are hesitated and lack to write the concepts that they learnt in the class.
- Some students make mistake in the way of access the members of structure. After final discussion they got clear understanding.
