

Department of Information Technology
Academic Year 2023 - 2024 (Even Semester)

Degree, Semester & Branch: II Semester B.Tech. IT

Course Code & Title: CS3251 & Programming in C

Name of the Faculty member (s): Mrs. G.Mareeswari, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit V / File Handling in C
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO12
- **Activity Chosen:** Reflection

- **Justification:**

Students learned the basics of file handling in the previous semester in python programming language. In C Programming, also File handling is an important topic file is used to storing information that can be processed by the programs. Reflection is a process that helps teachers identify their own teaching process and analyze how their way of teaching might be improved. In this Reflection activity the students have to write down their questions that are confusing them so that the instructor can discuss and clarify the concepts in the class.

- **Time Allotted for the Activity:** 15 Minutes

- **Details of the Implementation:**

After explaining the file concepts in the class, in order to know the level of understanding of the students about the topic, the students were insisted to write their doubts and the concept they need more understanding in the paper. The instructor collected the paper and allotted 10 minutes time in the next hours to discuss and cleared all the doubts in next class session as shown in Figure1.b, that make them for better understand . Figure 1.a shows the points the students shared as their doubt in the file concept and also response for the doubt cleared by the instructor. Figure1.b shows for some doubts the faculty commonly cleared the doubt in front of class to all the students in the class.Through this activity the students go through the topic that taught in class

once and they expressed their doubts and faculty cleared the doubts. The students felt that they understand the ideas better.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PSO1	PSO2	PSO3
CO5	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PSO1	PSO2	PSO3
	2	1	1	1	1	1
Justification for correlation	Needs basic engineering knowledge for understand the concept of file handling.	File concept can also be used to analyze the complex engineering problems.	The students can able to find solution for the complex problems using the various operations of files.	File reading and writing are used in many data science projects to solve complex computational problem	The students can apply the concept of file handling in research finding and provide reliable solution	The students can use this concept of file handling in software project development.

• **Images / Screenshot of the practice:**

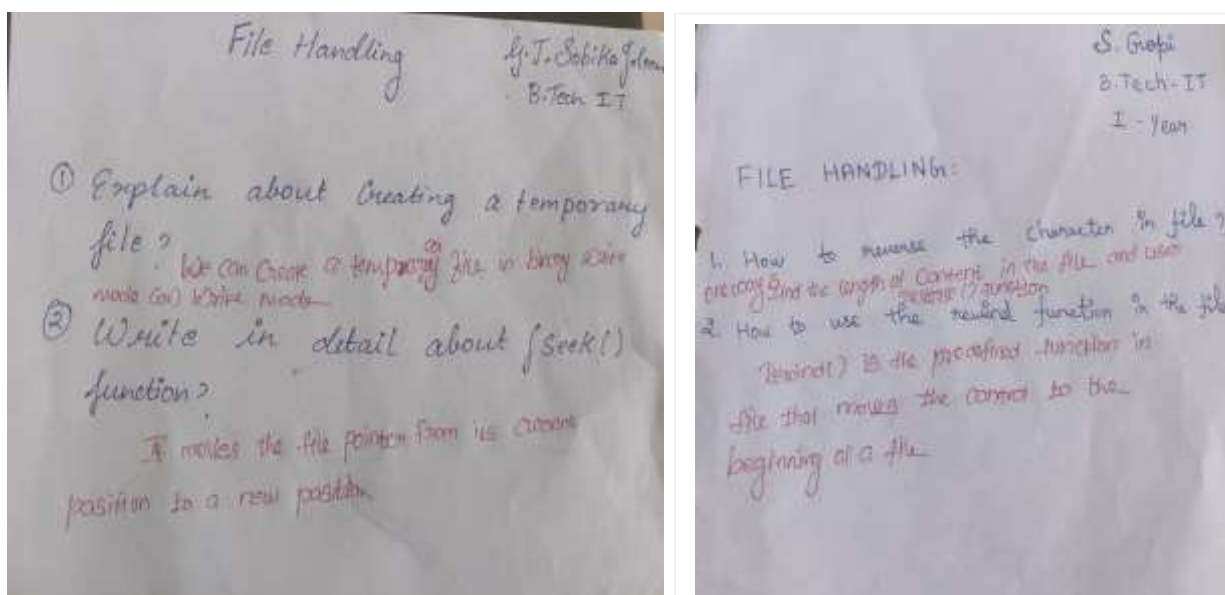

Figure 1. a Sample of Question shared by G. J. Sobika Joleen and S. Gopi

Figure 1. b Sample of instructor clear the doubt of students Pavithra.M and Selva Gayathri

Reflective Critique:

❖ *Feedback of practice from students and other stakeholders:*

- The students felt that this activity can gave them a chance to represent their doubts among all the students. ‘
- They also got the additional clarification related to the file topic

❖ *Benefit of the practice:*

- Students were actively participated in this activity.
- Students felt this activity makes them to recollect the concepts and get clear understanding of topic by clarifying the doubts.

❖ *Challenges faced in implementation:*

- Some students were struggled to communicate their doubts in suitable English sentences, and some questions were unclear.
- Some students are hesitated to share their doubts and not written any doubts.
