

Department of Information Technology
Academic Year 2024–2025 (Odd Semester)

Degree, Semester & Branch : V Semester, B.Tech, IT
Course Code / Title : MX3083/ Film Appreciation
Name of the Faculty member : Mr. G. Mareeswari

Innovative Practice Description

- **Theme/ Topic:** Theme A – The Story, Screenplay and Script
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO4
- **Activity Chosen:** Flipped Classroom
- **Justification:**

The flipped classroom is an instructional strategy where traditional teaching methods are inverted or "flipped." Students are assigned materials to study before the class. This activity allows them to gain exposure to the content independently at their own pace. Classroom time is then dedicated to interactive learning activities, discussions. It assists the instructor/faculty in redefining in-class activities, assigning homework, and maintaining student interest in the concept. The film appreciation concepts story, screenplay and scripts were already known by the students so this flipped classroom activity is planned for this topic.

- **Time Allotted for the Activity:** 20Minutes
- **Details of the Implementation:**
 - The learning materials were posted to the students in canvas two days before the topic discussion.
 - The students were already aware of this concept in their real life scenario.
 - The students are instructed to study the material and take notes on the topic based on their understanding.
 - On the day of the activity the students were grouped into a team of 4 members and

they are asked to discuss about the topic they learnt in their home through the study materials for the duration of 10 minutes.

- After the discussion member from each team had a chance to present and share the idea to the entire class as shown in Figure 1 & 2
- **Plan:** Separate student's teams are formed and made them to explore as a group.
- **Identify and Share:** Related materials are identified and posted relevant materials /notes of the topic. Harikrishnan K and Gowdhamaan.M, Sivamaharaj. S, Muthupandi. P, and Harish. S team are requested to present the concepts they have learnt and share it to the entire class students.
- **Evaluate:**
 - I have prepared few questions related to the content shared and ask those questions in next class session and make the students to write/ present in class.
 - Make the students to find out the answer by their own by learning.
- **CO-PO/ PSO mapping:**

CO	PO5	PO6	PO9	PO10	PO12
CO1	1	1	3	2	1
(1– Low 2 –Moderate 3 – High)					

- **PO/ PSO mapped:**

Innovative practice	PO5	PO6	PO9	PO10	PO12
	1	1	3	2	1
Justification for correlation	Learn advanced filmmaking tools and techniques to produce high-quality visual content.	Ability to produce films that address social, cultural, and ethical issues responsibly.	Students involved in this activity as an individual and also as a team.	Communicate/ share the ideas with other students	Encourage students to continuously update their skills and knowledge

- **Images/ Screenshot of the practice:**

Figure 1 and 2 shows the Glimpses of presentation done by Harikrishnan K and Gowdhamaan.M, Sivamaharaj. S, Muthupandi. P, and Harish. S team during the flipped class room Activity.

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Student felt good, since they can study at their own pace/time.
- They felt that through this type of active learning, they can explore themselves more.

- ❖ ***Benefit of the practice:***

- This activity provides one-to-one time between teacher and student.
- It represents the way of learning by collaboration within the students.
- Students learn at their own pace.
- Practical things–like missing class due to illness – become less problematic.
- It encourages students to come to class prepared.

- ❖ ***Challenges faced in implementation:***

- The activity depends on student preparation–few students did not come prepared.
- The depth of the subject can be dictated by the student themselves or the group the student is working with.
- The time and effort required from a teacher's perspective initially when creating the flipped class material is higher than for a traditional class.
