

RAMCO INSTITUTE OF TECHNOLOGY

(An Autonomous Institution)

Approved by AICTE, New Delhi & Affiliated to Anna University
NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE, MECH and CIVIL

Department of Information Technology **Academic Year 2025 - 2026 (Even Semester)**

Semester, Degree & Branch: VI Semester, B.Tech. IT

Course Code & Title: CCS343 & Digital and Mobile Forensics

Name of the Faculty member (s): Mrs. G.Sivasathiya, AP/IT

Innovative Practice Description

- **Unit / Topic:** Unit IV / Jailbreaking
- **Course Outcome:** CO4
- **Topic Learning Outcome:** TLO9
- **Activity Chosen:** Flipped Classroom

- **Justification:**

Flipped classroom practice helps students learn the concepts of jailbreaking and AI security threats independently before attending the class. This method promotes active participation, peer learning, critical thinking, and collaborative discussion during classroom sessions. It also improves students' understanding of real-world cybersecurity challenges and encourages self-directed learning.

- **Time Allotted for the Activity:** 20 Minutes

- **Details of the Implementation:**

- Before the class, students were instructed to watch short video materials and read brief notes related to jail breaking attacks, prompt injection techniques, and AI security risks.
- Students were divided into groups consisting of 5 to 6 members.
- During the classroom session, students presented their understanding of the topic through peer teaching, discussion, and demonstrations.
- Students actively participated in collaborative learning, which improved their communication and analytical skills. Fig 1.shows Sakthi Sha S handling session for her classmates.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO4	3	1	2	2	3	1	3	3	2	1	3	3

(1 – Low

2 – Moderate

3 – High)

PO/PSO Mapped:

Innovative Practice	PO1	PO2	PO3	PO4	PO5	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO4	3	1	2	2	3	1	3	3	2	1	3	3
Justification for Correlation	The students could be able to use the basic mathematical knowledge to the iOS forensics.	The students could be able to formulate and analyze the iOS forensics for real-time applications	The students could be able to design the various methods in iOS forensics for real time problems	Real Time The students could be able to interpret and analyze the real world application using iOS forensics.	The students could be able to use iOS forensics methods	The students will work as a team and as an individual and demonstrate communication, problem-solving skills	The students will work as a team and as an individual and demonstrate communication, problem-solving skills	The students will be able to identify the task required to build the methods for iOS forensics	The student will identify the technological advances made in the past and update the concepts in iOS forensics..	The students could be able to provide the solution for iOS forensics with computational skills to any real-world problem	The students could be able to provide the IT solution with the iOS forensics.	The students could be able to develop software application for iOS forensics.

Figure 1. Sakthi Sha S handling session about Jailbreaking concept.

Reflective Critique:

❖ ***Feedback of practice from students and other stakeholders:***

- Students found peer teaching more engaging and interactive compared to traditional lecture methods.
- Faculty members observed improved student involvement and collaborative learning.
- The activity encouraged students to explore real-world cybersecurity threats independently.

❖ ***Benefit of the practice:***

- Encourages self-learning and critical thinking abilities.
- Helps students understand emerging cybersecurity threats through collaborative discussions.
- Promotes deeper understanding of ethical hacking and AI security concepts.

❖ ***Challenges faced in implementation:***

- Some students did not complete the pre-class preparation effectively.
- Managing equal participation among all group members was challenging.
- Additional classroom time was required for presentations and discussions.
